Value Management Incentive Program Innovations In Delivering Value:

Value Management Implementation in Construction Ayodeji E. Oke, Seyi S. Stephen, Clinton Ohis Aigbavboa, 2022-02-24
Value Management Implementation in Construction addresses various factors that can enhance the application of the discipline as well as its adoption among concerned stakeholders and discusses the practice of value management in various developed and developing countries

Value Management Incentive Programme Nigel A. Standing, 2001
Value management incentive programmes and clauses are a powerful mechanism for allowing continuity of contractors input throughout a project delivery The fact that incentive programmes have been overlooked in the reports and publications portraying alliancing and partnering as the way forward means that this effective tool has been largely lost to the UK construction industry The book considers value incentive programmes in depth highlighting their application and benefits to client and contractor It provides an insight into contractor led value engineering and its effective use in different procurement forms

Procurement Routes for Partnering Jon Broome, 2002
This book is aimed at those who want to apply or improve the application of partnering in the construction and heavy engineering industries to their projects It focuses on procurement aspects based on the premise that unless the commercial and contractual conditions align objectives there is little stimulus to change the culture and integrate processes and teams to achieve the outstanding results that can be attained through partnering This invaluable book presents detailed information about the partnering and procurement process which will lead to better delivery of construction projects

Strategic Management in Construction David Langford, Steven Male, 2008-04-15
This book reviews the general theory of strategy relates it to the particular circumstances of the construction industry and shows how it can be applied in practice It brings together ideas from economics marketing management business and politics to develop strategic management for both contractors firms and the associated professions Substantial changes have occurred in the industry since the book was first published in 1991 This Second Edition reflects the major developments that have followed the Latham and Egan reports and includes new chapters on international strategy and marketing showing how they can contribute to the strategic planning of construction organizations The book will provide a valuable tool for the strategic development of construction firms Ten years separate the editions during which period a significant number of British and other construction firms which had survived generations of proprietors merged changed beyond recognition or ceased trading One can not but wonder if publication of a work on strategic planning some twenty year earlier might have saved some of them

Construction Manager The book presents the essential elements for managing at this higher level and should be a must for any construction professional who aspires to an executive position in industry as well as any student for construction management project management and organizational management in construction It comes highly recommended
