Values-Based Commissioning of Health and Social Care Christopher Heginbotham,2012-06-28 Health and social care commissioning is a values driven as well as evidence driven enterprise However whereas there has been an expectation that the evidence base of commissioning should be made fully explicit the corresponding values base has been left largely implicit The book addresses this subject through a detailed discussion of values and values based practice illustrated with case examples and by developing a critique of existing commissioning This approach enables commissioners to identify and make explicit the often diverse values of all those involved whether as commissioners providers or users of services It provides a skills base and other support processes for working with differences in values held by all those engaged in making commissioning decisions This will be essential reading for doctors both experienced and in training commissioning managers professional staff in NHS Foundation Trusts and the private sector and all at the sharp end of practice

Values-Based Interprofessional Collaborative Practice Jill Thistlethwaite,2012-09-13 Discusses values from the perspective of different health care professionals and why teams and collaborations may succeed or fail

Professional Autonomy Ricardo A. Ayala,2024-12-26 Aimed at supporting their emancipatory project this book explores strategies for resisting dominance and enhancing agency within the caring professions It helps bridge the gap between theoretical and practical autonomy in these fields which have long been overshadowed by other professional groups The book scrutinises the often misunderstood notion of autonomy which is

frequently equated with mere independence an equation that can paradoxically undermine rather than improve care quality Additionally it critiques the prevailing lack of a specific philosophical framework for practice Existing literature typically approaches professional autonomy through a liberal philosophy lens or loosely assigns moral agency to groups leading to a view of autonomous professions as analogous to autonomous individuals By presenting a critical overview of the main schools of thought on autonomy emphasising group autonomy and the specific challenges faced by caring professions this book aims to fill a significant gap It includes case studies to ground its theoretical insights in practical examples from real world scenarios helping the caring professions identify both autonomy issues and opportunities for enhancing autonomous practice

Moral Issues in Military Decision Making Anthony E. Hartle,2004 Much has changed in warfare in recent years with America now dominant on the international scene and terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published Moral Issues in Military Decision Making reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations for America s military leadership in the post 9 11 era Considering world affairs since the first edition the Gulf War Bosnia Afghanistan Iraq 9 11 and the emergence of the United States as an unrivaled military power Hartle explains how these events have raised ethical issues that differ dramatically from those of the Cold War by the war on terrorism homeland defense asymmetric warfare the proliferation of American military interventions and the UN s role in peacekeeping operations Using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields In this revision Hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research In a new chapter on human rights he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America s citizens and borders His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission
