

A photograph of a man in a white shawl and a woman in an orange shirt walking in a hot, dusty environment. The man is in the foreground, looking towards the camera with a serious expression. The woman is in the background, walking away. The background is blurred, showing other people and a yellow and green auto-rickshaw. The overall scene suggests a hot, arid climate.

Ursula Curtiss,Liza\* Ross,     Deadly Climate Richard Barth,1993     The Empire of Climate David N. Livingstone,2026-03-31 How the specter of climate has been used to explain history since antiquity Scientists journalists and politicians increasingly tell us that human impacts on climate constitute the single greatest threat facing our planet and may even bring about the extinction of our species Yet behind these anxieties lies an older much deeper fear about the power that climate exerts over us The Empire of Climate traces the history of this idea and its pervasive influence over how we interpret world events and make sense of the human condition from the rise and fall of ancient civilizations to the afflictions of the modern psyche Taking readers from the time of Hippocrates to the unfolding crisis of global warming today David Livingstone reveals how climate has been critically implicated in the politics of imperial control and race relations been used to explain industrial development market performance and economic breakdown and served as a bellwether for national character and cultural collapse He examines how climate has been put forward as an explanation for warfare and civil conflict and how it has been identified as a critical factor in bodily disorders and acute psychosis A panoramic work of scholarship The Empire of Climate maps the tangled histories of an idea that has haunted our collective imagination for centuries shedding critical light on the notion that everything from the wealth of nations to the human mind itself is subject to climate s imperial rule     The Climatologist. V. 1, No. 1, Jan. 1888 ,1888     **Why Climate Breakdown Matters** Rupert Read,2022-07-14 Climate change and the destruction of the earth is the most urgent issue of our time We are hurtling towards the end of civilisation as we know it With an unflinching honest approach Rupert Read asks us to face up to the fate of the planet This is a book for anyone who wants their philosophy to deal with reality and their climate concern to be more than a displacement activity As people come together to mourn the loss of the planet we have the opportunity to create a grounded hopeful response This meaningful hopefulness looks to the new communities created around climate activism Together our collective mourning enables us to become human in ways previously unknown Why Climate Breakdown Matters is a practical guide on how to be a radical responsible climate activist     **Reconfiguring the Global Governance of Climate Change** John J. Kirton,Ella Kokotsis,Brittaney Warren,2022-03-31 This book charts the course and causes of UN G7 and G20 governance of climate change through the crucial period of 2015 2021 It provides a careful comprehensive and reliable description of the individual and interactive contributions of the G7 G20 and UN summits and analyses their results The authors explain these contributions and results by considering the impacts of causal candidates such as a changing physical ecosystem and international political system and the actions of individual leaders of the world s most systemically significant countries They apply and improve an established compact causal model grounded in international relations theory to guide these tasks By developing prescribing and implementing immediate realistic
