The Poetry of Being and the Prose of the World in Early Greek Philosophy Victoria Wohl,2025-08-27 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more The Presocratic philosophers writing in Greece in the sixth and fifth centuries BCE invented new ways of thinking about human life the natural world and structures of reality They also developed novel ways of using language to express their thought In this book Victoria Wohl examines these innovations and the productive relation between them in the work of five figures Parmenides Heraclitus Empedocles Anaxagoras and Democritus Bringing these thinkers into conversation with modern critical theorists on questions of shared concern Wohl argues for the poetic sophistication of their work and the inextricable convergence of their aesthetic form and philosophical content In addition to offering original readings of these fascinating figures and robust strategies for interpreting their fragmentary rebarbative texts this book invites readers to communicate across entrenched divisions between literature and philosophy and between antiquity and modernity
