which is why this paper aims to present both evidence in favor and arguments against its existence or interpretation Furthermore the phenomenon shall be examined in more detail investigating its backgrounds possible explanations influencing factors and its consequences on android design Among the issues to be further investigated that were found in the discussion are alternative stimuli the empirical measurement of the uncanny response a universal categorization system and the usefulness of the Uncanny Valley as a design guide There are indications that the relationship between human likeness and likeability may not be as clear as proposed by Mori but more dimensional with additional factors to consider
