Understanding Reference Transactions:

New Concepts in Digital Reference R. David Lankes, 2022-05-31 Let us start with a simple scenario a man asks a woman how high is Mount Everest The woman replies 29 029 feet Nothing could be simpler Now let us suppose that rather than standing in a room or sitting on a bus the man is at his desk and the woman is 300 miles away with the conversation taking place using e mail Still simple Certainly it happens every day So why all the bother about digital virtual electronic chat etc reference If the man is a pilot flying over Mount Everest the answer matters If you are a lawyer going to court the identity of the woman is very important Also if you ever want to find the answer again how that transaction took place matters a lot Digital reference is a deceptively simple concept on its face the incorporation of human expertise into the information system This lecture seeks to explore the question of how human expertise is incorporated into a variety of information systems from libraries to digital libraries to information retrieval engines to knowledge bases What we learn through this endeavor begun primarily in the library context is that the models methods standards and experiments in digital reference have wide applicability We also catch a glimpse of an unfolding future in which ubiquitous computing makes the identification interaction and capture of expertise increasingly important It is a future that is much more complex than we had anticipated It is a future in which documents and artifacts are less important than the contexts of their creation and use

The Reference Interview Today Dave Harmeyer, 2014-02-07 More an art than a science the reference interview requires not only knowing a specific set of skills but also how to apply those skills in an ever changing world Good reference interviews accomplish three goals establishing contact with the user determining what the user s information need actually is and checking to make sure that the answer actually meets that need completely Built around timeless service principles including Ranganathan s Five Laws The Reference Interview Today Negotiating and Answering Questions Face to Face on the Phone and Virtually is a practical field guide to conducting reference interviews in every modality face to face phone chat text virtual world such as Second Life and even mashup reference interviews where multiple modalities are used to answer the question Following a concise presentation of reference interview basics the heart of the book is 12 different reference interview scenarios set in different modes and demonstrating a specific principle Each of these twelve follows a similar construction a general overview of the principle for example save the time of the reader a script of the reference interview and then learning questions designed to demonstrate the principle s as illustrated in the script Examples range from assisting faculty members with scholarly resources to helping a high school student with a paper to assisting a hairdresser with a reference question One scenario is based in the year 2025 to emphasize the timeless nature of reference service Seamlessly combining both time honored principles and multiple technologies this practical book demonstrates how librarians can be as relevant and necessary in the digital age as in the print world Appropriate for both

novice and experienced librarians as well as for LIS students this concise handbook speaks to those working in or preparing for careers in public school academic and special libraries Measuring Quality Roswitha Poll, Peter te Boekhorst, 2008-11-03 The first edition of this handbook appeared in 1996 and dealt with academic libraries It gained wide acceptance and was translated into five other languages After ten years the new edition widens the perspective to public libraries and adds indicators for electronic services and cost effectiveness The handbook has been considerably enlarged from 17 to 40 indicators It gives practical help by showing examples of possible results for each indicator The handbook is intended as practical instrument for the evaluation of library services Although it aims specifically at academic and public libraries most indicators will also apply to all other types of libraries **Crash Course in Reference** Charlotte

Ford, 2008-04-30 This introductory book is a basic review of reference services in public libraries It includes tips on locating resources in both print and online formats makes suggestions for purchases and maintenance of the reference collection reviews the ethical aspects of providing information to all patrons and provides information on how to join a network of reference librarians who can assist you when you cannot find an answer A basic explanation of reference services for those with little formal LIS training working in small rural libraries or others who have been working in other areas and wish to brush up on their skills this author provides an introduction to reference services including search strategies

Conducting the Reference Interview Catherine Sheldrick Ross, Kirsti Nilsen, Patricia Dewdney, 2002 This handbook offers information and tips for librarians on conducting the reference interview It features models of communication such as sense making and microtraining exercises for avoiding common pitfalls and examples of both successful and problematic interviews
