Massey, John Allen, 1990 **British Policy and European Reconstruction After the First World War** Anne Orde, 2002-04-18 This book is a study of the political economy of Europe after 1919 *Towards an Inclusive Democracy* Takis Fotopoulos, 1997-05-01 An analysis of the growth economy this book traces the causes of the present crisis in the modern market system initiated two centuries ago with the establishment of the market economy system which has led to the present growth economy It concludes that a true democracy can only be derived from a synthesis of the democratic and socialist traditions along with the radical green feminist and libertarian ideologies To this end this text offers a new vision of an inclusive democracy **Select List of References on Economic Reconstruction** Library of Congress. Division of Bibliography, 1919 **The Economy in Question** Doreen Massey, 1988-11-16 A broad introductory text this volume surveys recent shifts in the British economy and their impact on the regional distribution of resources this is the first title in a major Open University series on the restructuring of Britain **The Genoa Conference for the Economic and Financial Reconstruction of Europe April 10 to May 19, 1922** Canada. Delegation to the Genoa economic and financial conference, 1922 **Reconstruction, Political and Economic, 1865-1877** William Archibald Dunning, 1877 **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance

inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
