Engaging Young Readers Linda Baker, Mariam Jean Dreher, John T. Guthrie, 2000-03-07 This volume demonstrates how promoting children's engagement with reading can greatly enhance reading achievement. From leading literacy researchers and educators, the book illuminates what a child needs to become an engaged reader and presents a set of instructional principles designed to facilitate this goal. Helping teachers offer a coordinated emphasis on competence and motivation in reading instruction, chapters blend research evidence with practical recommendations. Topics covered include ways to provide children with a good foundation at the word level, help if they are in trouble, ample time and materials for reading opportunities to share in a community of learners, instruction that is coherent, motivating, and responsive to each child's strengths and weaknesses, school-wide coordination of instruction, and continuities between home and school. *Engaging Young Readers* Linda Baker, Mariam Jean Dreher, John T. Guthrie, 2000 This volume demonstrates how promoting children's engagement with reading can greatly enhance reading achievement. From leading literacy researchers and educators, the book illuminates what a child needs to become an engaged reader and presents a set of instructional principles designed to facilitate this goal. Helping teachers offer a coordinated emphasis on competence and motivation in reading instruction, chapters blend research evidence with practical recommendations. [Developing Engaged Readers in School and Home Communities](#) Linda Baker, Peter Afflerbach, David Reinking, 2012-12-06 This book comprises a synthesis of current directions in reading research, theory, and practice unified by what has been referred to as the engagement perspective of reading. This perspective guides the research agenda of the National Reading Research Center (NRRC), a consortium of the University of Georgia, University of Maryland, and affiliated scholars. A major goal of the book is to introduce reading researchers to the engagement perspective as defined by the NRRC and to illustrate its potential to integrate the cognitive, social, and motivational dimensions of reading and reading instruction. Engaged readers are viewed as motivated, strategic, knowledgeable, and socially interactive. They read widely for a variety of purposes and capitalize on situations having potential to extend literacy. The book is organized into four sections representing key components of the NRRC research agenda and the engagement perspective. This perspective emphasizes contexts that influence engaged reading. Accordingly, the first section of the volume focuses on the social and cultural contexts of literacy development, with chapters devoted to examining home influences, home-school connections, and the special challenges facing ethnic minorities. The engagement perspective also implies greater attention to the role of motivational and affective dimensions in reading development than traditional views of reading. Therefore, the second section examines motivational theory and its implications for reading.

engagement with special attention to characteristics of classroom contexts that promote motivation in reading The engagement perspective embraces innovative instructional contexts that address the cognitive social and motivational aspects of reading Thus the third section includes chapters on current directions in promoting children s learning from text on the value of an integrated curriculum in promoting reading engagement and on the challenges of assessing students development as engaged readers Finally the broader conception of reading implied by the engagement perspective requires an expanded array of research approaches sensitive to the complex and interacting contexts in which children develop literacy The concluding section focuses on these important contemporary issues in literacy research and educational research with chapters examining the variety of alternative modes of inquiry gaining prominence in literacy research teacher inquiry and ethical issues of collaboration between university and teacher researchers Intended for university based researchers graduate students and classroom teachers this volume brings together researchers who think about students and their literacy development in school and home communities in distinctly different ways The cooperative and collaborative inquiry presented contributes to a richer understanding of the many factors influencing engaged reading
