

Temporal Logic

- TL is used to describe **dynamic** behavior of programs.
- TL is used to **formulate properties** of **reactive programs** which do not compute an 'answer', but are intended to **run indefinitely** and still **correctly** exhibit dynamic behavior in response to **external stimuli**.
- A good example is the **clock system**.

Hour, $hr \in \{1 \dots 12\}$; Minute, $min \in \{1 \dots 60\}$

if $hr < 12$ then $hr' = hr + 1$ else $hr' = 1$

where hr' is the next hour. Property minute can change while the hour remains the same.

Temporal Logic Of Programs:

Temporal Logic of Programs Fred Kröger, 2012-12-06 Introduction to the temporal logic of in particular parallel programs Divided into three main parts Presentation of the pure temporal logic language semantics and proof theory Representation of programs and their properties within the language of temporal logic Application of the logical apparatus to the verification of program properties including a new embedding of Hoare's logic into the temporal framework

Executing Temporal Logic Programs B. C. Moszkowski, 1986-03-06 Temporal logic is gaining recognition as an attractive and versatile formalism for rigorously specifying and reasoning about computer programs digital circuits and message passing systems This book introduces Tempura a programming language based on temporal logic Tempura provides a way of directly executing suitable temporal logic specifications of digital circuits parallel programs and other dynamic systems Since every Tempura statement is also a temporal formula the entire temporal logic formalism can be used as the assertion language and semantics One result is that Tempura has the two seemingly contradictory properties of being a logic programming language and having imperative constructs such as assignment statements The presentation investigates Interval Temporal Logic a formalism with conventional temporal operators such as next and always as well as lesser known ones such as chop This provides the basis for Tempura The design of an interpreter for Tempura is also included as are a variety of sample Tempura programs illustrating how to model both hardware and software *The Temporal Logic of*
