Into the World: The Movement of Patočka's Phenomenology Martin Ritter, 2019-10-15 Critically evaluating and synthesizing all the previous research on the phenomenology of Czech philosopher Jan Patočka the book brings a new voice into contemporary philosophical discussions It elucidates the development of Patočka's phenomenology and offers a critical appropriation of his work by connecting it with non phenomenological approaches The first half of the book offers a succinct and systematizing overview of Patočka's phenomenology throughout its development to help readers appreciate the motives behind and grounds for its transformations The second half systematically explicates critically examines and creatively develops Patočka's concept of the movement of existence as the most promising part of his asubjective phenomenology The book appeals to new readers of Patočka as well as his scholars and to students and researchers of contemporary philosophy concerned with topics such as embodiment personal identity intersubjectivity sociality or historicity By re-assessing Patočka's philosophy of history and his civilizational analysis it also helps to better articulate the question of the place of Europe in the post European world
