Green Building Advanced:

Green and Smart Buildings Nilesh Y. Jadhav, 2016-10-01 This book highlights the various technologies that are currently available or are now being developed for the green and smart buildings of the future. It examines why green building performance is important and how it can be measured and rated using appropriate benchmarking systems. Lastly, the book provides an overview of the state of the art in green building technologies and the trend towards zero energy or net positive energy buildings in the future. *Green Architecture (GreenSource Books)* Osman Attmann, 2009-12-11 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. *The Definitive Guide to Green Architecture* Written by an architect specializing in green materials and methods, this GreenSource book presents all of the information you need to design efficient, environmentally friendly, economical, and sustainable buildings. Green Architecture surveys new developments, innovative techniques, and emerging technologies that support environmentally responsive architecture. Residential, commercial, and institutional high performance buildings are discussed. This architectural resource includes details on green building rating systems, energy generation and retention, water and waste management, and green building materials. In-depth case studies highlight advanced green buildings, active and passive solar buildings, self-sufficient off the grid modular and mobile systems, and solar decathlon competition projects. Green Architecture covers definitions, operationalizations, and history of green architecture. Green building rating systems including LEED and BREEM. Solar, geothermal, wind, hydro, fuel cell, and other green energy generation technologies. Green insulation, HVAC, water and waste management technologies. Passive solar design methods. Green materials including biomaterials, biopolymers, bioplastics, and composites. Thermo-light and stimulus responsive smart materials. Nanomaterials. More than 100 case studies. *Advanced Energy Technologies for Green Buildings* Beemkumar Nagappan, Gloria Pignatta, Ad Dhass, 2026-04-13 This book provides an overview of the principles of green building and energy efficient systems, including benefits of green buildings, the different types of green building rating systems, and the various energy efficient systems that can be used in buildings. [Proceedings of the 24th International Symposium on Advancement of Construction Management and Real Estate](#) Gui Ye, Hongping Yuan, Jian Zuo, 2021-06-07 This book covers various current and emerging topics in construction management and real estate. Papers selected in this book cover a wide variety of topics such as new type urbanization planning and construction of smart city and eco city, urban rural infrastructure development, land use and development, housing market and housing policy, new theory and practice of construction project management, big data application, smart construction and BIM, international construction, i.e. belt and road project, green building, off site prefabrication, rural rejuvenation and eco civilization, and other topics related to construction management and real estate. These papers provide useful references to both scholars and practitioners. This book is the documentation of The 24th International Symposium on Advancement of Construction Management and Real
