Syntax A Functional Typological Introduction Volume Ii:

Syntax Talmy Givón,1984 The long awaited second volume of the two volume work on syntax from a functional typological perspective Grammar is viewed as a non arbitrary language processing device to be understood in terms of the various substantive parameters relevant to language Communicative function cognitive processing socio culture and neuro biology Distortions in this complex yet highly iconic code are due to conflicting functional requirements most commonly introduced into the code through the course of diachronic change Cross linguistic variation within each functional domain is highly constrained and yields a coherent typology of the most natural ways the same communicative function can be performed The volume covers the syntax of complex clauses and is organized according to the following plan Chapter 12 Noun phrases Chapter 13 Verbal complements Chapter 14 Voice and de transitivization Chapter 15 Relative clauses Chapter 16 Contrastive focus constructions Chapter 17 Marked topic constructions Chapter 18 Non declarative speech acts Chapter 19 The grammar of interclausal coherence Chapter 20 The grammar of referential coherence as mental processing instructions Chapter 21 Markedness and iconicity in syntax   *Language Typology and Syntactic Description: Volume 2, Complex Constructions* Timothy Shopen,2007-10-04 This unique three volume 2007 survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world s languages Clearly organized and broad ranging it covers topics such as parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect mood and diexis The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages Each volume is accessibly written and clearly explains each new concept introduced Although the volumes can be read independently together they provide an indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations Most of the chapters in the second edition are substantially revised or completely new some on topics not covered by the first edition Volume II covers co ordination complementation noun phrase structure relative clauses adverbial clauses discourse structure and sentences as combinations of clauses   **Syntax** Talmy Givón,1984   The Grammar of Causation and Interpersonal Manipulation Masayoshi Shibatani,2002 This volume presents fifteen original papers dealing with various aspects of causative constructions ranging from morphology to semantics with emphasis on language data from Central and South America Informed by a better understanding of how different constructions are positioned both synchronically e g on a semantic map and diachronically e g through grammaticalization processes the volume affords a comprehensive up to date perspective on the perennial issues in the grammar of causation such as the distribution of competing causative morphemes the meaning distinctions among them and the overall form meaning correlation Morphosyntactic interactions of causatives with other phenomena such as incorporation and applicativization receive focused attention as such basic issues as the semantic distinction between direct and indirect causation and the typology of causative constructions   *Passivization and Typology* Werner Abraham,Larisa

Leisiö,2006-01-01 Is the passive a unified universal phenomenon The claim derived from this volume is that the passive if not universal has become unified according to function Language as a means of communication needs the passive or passive like constructions and sooner or later develops them based on other voices impersonal active middle reflexive specific semantic meanings such as adversativity or tense aspect categories stative perfect preterit Certain contributors review the passives in various languages and language groups including languages rarely discussed Another group of contributors takes a novel theoretical approach toward passivization within a broad typological perspective Among the languages discussed are Vedic Irish Mandarin Chinese Thai Lithuanian Mordvin and Nganasan next to almost all European languages Various theoretical frameworks such as Optimality Theory modern structuralist approaches Role and Reference Grammar cognitive semantics Distributed Morphology and case grammar have been applied by the different authors   Issues in Cognitive Linguistics Leon de Stadler,Christoph Eyrich,2011-04-20 No detailed description available for Issues in Cognitive Linguistics   *Syntax* Talmy Givón,2001-01-01 This new edition of Syntax A functional typological introduction is at many points radically revised In the previous edition 1984 the author deliberately chose to de emphasize the more formal aspects of syntactic structure in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure With hindsight the author now finds the de emphasis of the formal properties a somewhat regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity Lastly Syntax treats synchronic typological diversity more explicitly as the dynamic by product of diachronic development or grammaticalization In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization   **Premodifiers in English** Jim Feist,2011-10-27 The order and behaviour of the premodifier an adjective or other modifying word that appears before a noun has long been a puzzle to syntacticians and semanticists Why can we say the actual red ball but not the red actual ball And why conversely do some other premodifiers have free variation in sentences for example we can say both German and English speakers and English and German speakers Why do some premodifiers change the meaning of a phrase in some contexts for example young man can mean boyfriend rather than man who is young Drawing on a corpus of over 4 000 examples of English premodifiers from a range of genres such as advertising fiction and scientific texts and across several

varieties of English this book synthesises research into premodifiers and provides a new explanation of their behaviour order and use *Predicative Possession* Leon Stassen,2009-05-07 This is the first comprehensive treatment of the strategies employed in the world s languages to express predicative possession as in the boy has a bat It presents the results of the author s fifteen year research project on the subject Predicative possession is the source of many grammaticalization paths as in the English perfect tense formed from to have and its typology is an important key to understanding the structural variety of the world s languages and how they change Drawing on data from some 400 languages representing all the world s language families most of which lack a close equivalent to the verb to have Professor Stassen aims a to establish a typology of four basic types of predicative possession b to discover and describe the processes by which standard constructions can be modified and c to explore links between the typology of predicative possession and other typologies in order to reveal patterns of interdependence He shows for example that the parameter of simultaneous sequencing the way a language formally encodes a sequence like John sang and Mary danced correlates with the way it encodes predicative possession By means of this and other links the author sets up a single universal model in order to account for all morphosyntactic variation in predicative possession found in the languages of the world including patterns of variation over time Predicative Possession will interest scholars and advanced students of language typology diachronic linguistics morphology and syntax
