Inversion in Modern English Heidrun Dorgeloh, 1997-03-06 The book offers a comprehensive study of the different forms of subject verb and subject auxiliary inversion in Modern English declarative sentences It treats inversion as a speaker based decision for reordering within a fairly rigid word order system and identifies the meaning of the construction in terms of point of view and speaker subjectivity This semantic claim is tested against the occurrence as well as the absence of the different forms of inversion in natural discourse The analysis of the pragmatics and discourse function of inversion is based on the LOB and the Brown corpus and takes into account various textual relations British and American English written mode style text type genre The results suggest a strong affinity with the greater or lesser subjectivity of a text the construction is a marker of interpersonal meaning Provided the context is one of relative unexpectedness it additionally becomes a discourse marker which points to the limited value of quantitative corpus data in functional syntax **Naturalness and Iconicity in**
