## **World Architecture Chartwell:**

World Architecture Janice Anderson, 2007 Pictures and descriptions of many of the world's great architectural creations

*World architecture*, 1977      **Compelling Form** J. Donald Ragsdale, 2011-08-08 Compelling Form Architecture as Visual

Persuasion is an assessment of the visual persuasiveness of buildings. It demonstrates that architecture is as capable of social influence as speeches or advertisements are and that an awareness of this influence provides an insight into buildings' cultural roles. The book considers a diverse array of structures ranging from museums to performance halls to universities to cathedrals to governmental buildings to palaces and to skyscrapers. Compelling Form is an important extension of theories of persuasion and visual communication to architecture and engineering. The book bases its assessments on the elements of visual literacy and then on the elements of architectural design to demonstrate that buildings, monuments, and even such

means of commerce as bridges affect the viewer in such a way as to have social impact.      *American Architects and Texts*

Juan Pablo Bonta, 1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects. The text includes a ranked list of the 100 most famous architects.      **World Architecture**, 1996      **Professional Service Firms**

**and Politics in a Global Era** Chris Hurl, Anne Vogelpohl, 2021-08-31 This volume explores the influence of professional service firms on public policy making from a global perspective. Drawing on case studies from around the world, researchers from different disciplines including sociology, political science, geography, anthropology, history, and management studies examine how professional service firms have generated power in the policy making process. The chapters further investigate the structure and organization of these firms and their relationship with public agencies. They discuss the impact of strategies, techniques, and models promoted by these firms on political decision making. And they analyze how these firms have contributed to the formation of global policy pipelines facilitating the quick diffusion of policy ideas across time and space. Exposing how professional advisors can undermine democratic decision making, the chapters in this book explore the potential for resistance and regulation of public-private relationships.      Antiques, 1977-05      Coherency Management

Gary Doucet, Pallab Saha, Scott Bernard, 2009 The book introduces the idea of Coherency Management and asserts that this is the primary outcome goal of an enterprise's architecture. With submissions from over 30 authors and co-authors, the book reinforces the idea that EA is being practiced in an ever-increasing variety of circumstances from the tactical to the strategic, from the technical to the political, and with governance that ranges from sell to tell. The characteristics, usages, value statements, frameworks, rules, tools, and countless other attributes of EA seem to be anything but orderly, definable, classifiable, and understandable as might be hoped given heritage of EA and the famous framework and seminal article on the subject by John Zachman over two decades ago. Notably, EA is viewed as an Enterprise Design and Management approach adopted to build better enterprises rather than an IT Design and Management approach limited to building better systems.      **Passive**
