this contemporary controversy into the context of earlier debates about the two cultures between F R Leavis and C P Snow and Mathew Arnold and T H Huxley Through an interrogation of interdisciplinary approaches to literature and science and a discussion of the arguments surrounding postmodern culture the book formulates a literary critical methodology for literature science criticism highlighting both the benefits and the limitations of attempts to link the two cultures Three case studies focused through the issues of knowledge identity and time put this methodology into practice showing how ideas resonate through the culture between literature and science
