

Understanding Asthma

Children & Asthma

Over 10 million children in the United States have asthma, a chronic respiratory condition that causes the airways to become inflamed and narrow. This makes it difficult to breathe and can lead to coughing, wheezing, and chest tightness. Asthma is a leading cause of school absenteeism and hospitalizations in children.

What is Asthma?

Asthma is a chronic respiratory condition that causes the airways to become inflamed and narrow. This makes it difficult to breathe and can lead to coughing, wheezing, and chest tightness. Asthma is a leading cause of school absenteeism and hospitalizations in children.

Breathing & Gas Exchange

During breathing, air enters the lungs through the trachea and bronchi. In the alveoli, oxygen is exchanged for carbon dioxide. The blood then carries these gases to and from the rest of the body.

Measuring Air Flow

A spirometer is used to measure the volume of air inhaled and exhaled. This helps in diagnosing and monitoring asthma. A peak flow meter is used to measure the maximum speed of expiration.

Allergies & Asthma

Allergies can trigger asthma attacks. Common allergens include pollen, dust, mold, and pet dander. When an allergen enters the body, it causes an immune response that leads to inflammation and narrowing of the airways.

Normal Bronchiole

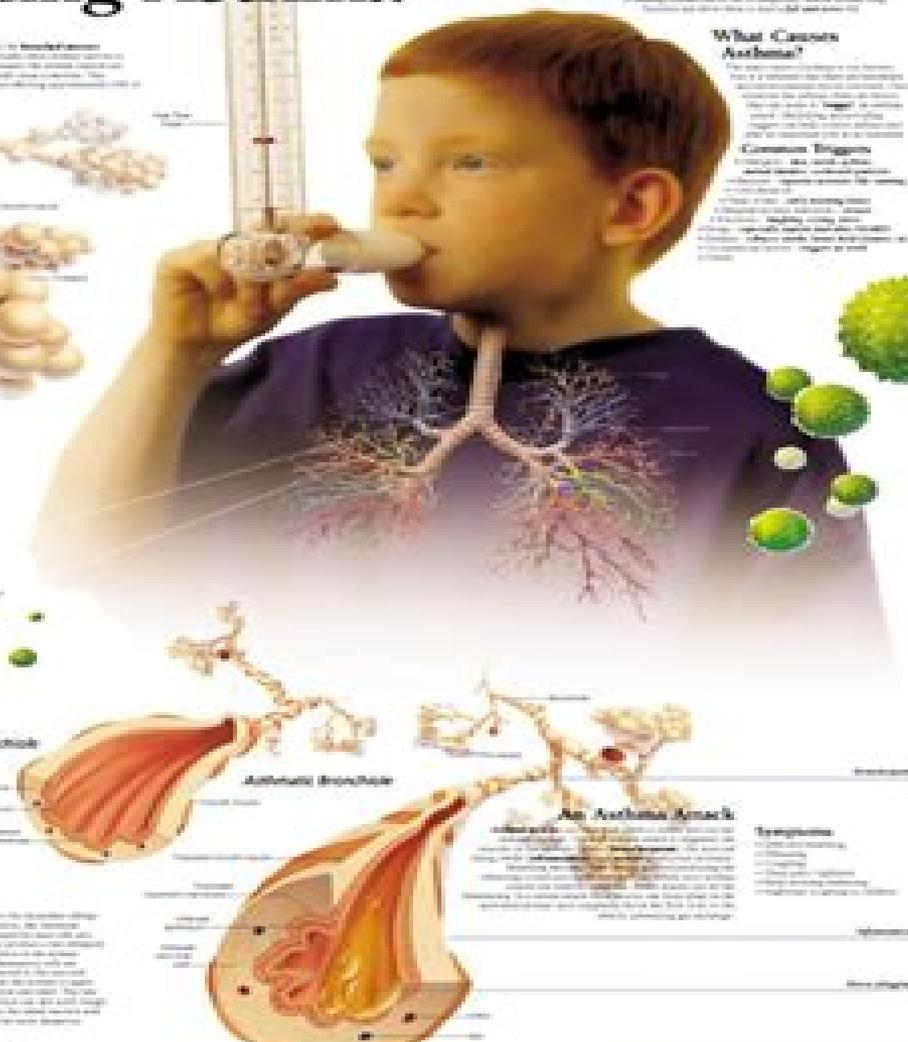

Airway with Allergen

Inflammation causes the airway walls to swell, narrowing the airway. This makes it difficult to breathe and can lead to coughing and wheezing.

Inflammation

Inflammation is the body's response to injury or infection. In asthma, it causes the airway walls to swell and produce mucus, further narrowing the airway.

Symptoms

- Coughing
- Wheezing
- Chest tightness

- Fatigue

Treatment of Asthma

Asthma is treated with medications that reduce inflammation and relax the airway muscles. These include inhaled corticosteroids and long-acting beta-agonists. Quick-relief inhalers are used to relieve acute symptoms.

Regular use of inhaled corticosteroids can help prevent asthma attacks. It is important to use these medications correctly and follow the doctor's instructions.
