Understanding Transatlantic Relations Serena Simoni, 2013-05-29 In light of the Arab Spring and after days of public quarreling that highlighted the divisions among NATO s members on an agreement to give command of the no fly zone in Libya to the Alliance it is evident that the U S is having problems engaging with its European allies and partners Why is this happening Breaking away from the conventional way to study transatlantic relations Serena Simoni uses a Constructivist theoretical lens to argue that the transatlantic partners changing identities since the early 1990s have influenced their political interests and as a consequence their national security policies Contemporary divergences are a notable byproduct of these transformations By focusing on cases of disagreement i e NATO s enlargement the International Criminal Court and Debt Relief for Africa this book shows how since the 1990s the US has started to see itself as the actor carrying the international defense burden while the European Union has developed an image of itself as the actor in charge of humanitarian efforts which generally entails diplomacy rather than military efforts Contemporary cases of disagreement as the Arab Spring Libya and Foreign Assistance in Africa illustrate how redefined national identities continue to alter the course of transatlantic relations Understanding Transatlantic Relations provides a more accurate examination of the future of transatlantic relations and offers an understanding of those issues that the United States and Europe would consider important enough to justify their cooperation

Environmental Politics and Foreign Policy Decision Making in Latin America Amy Below, 2014-12-05 Although the Kyoto Protocol an international agreement to address global climate change has been regarded by many as an unsuccessful treaty both politically and environmentally it stands as one of the world s few truly global agreements Why did such a diverse group of countries decide to sign and or ratify the treaty Why did they choose to do so at different times and in different ways What explains their foreign policy behavior Amy Below s book builds off the

increasing significance of climate change and uses the Kyoto Protocol as a case study to analyze foreign policy decision making in Latin America Below's study takes a regional perspective in order to examine why countries in Latin America made disparate foreign policy choices when they were faced with the same decision The book looks at the decisions in Argentina Mexico and Venezuela via a process tracing method Below uses information obtained from primary and secondary documents and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of Conference of the Parties speeches by presidents and country delegates The book complies with convention in the field by arguing that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables Environmental Politics and Foreign Policy Decision Making in Latin America considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory The book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics The Diplomatic Making of EU-China Relations Lucie Qian

Xia,2024-04-11 This book provides a novel theoretical framework to understand EU China diplomatic relations The existing scholarly literature on EU China relations is characterised by a dichotomous distinction between material and ideational factors and overemphasises the interest versus value motif undergirding EU China relations The diplomacy and future direction of the relationship seem as opaque as their extent remains incalculably complex This book takes us beyond binary motives by introducing a novel theoretical model of diplomatic relationship building that brings to the fore the more nuanced and latent factors to make sense of EU China diplomatic relationship building the new theory captures the relational nature of diplomatic relationship building by integrating the social layer of intentions in understanding international diplomacy This study further sheds light on the opportunities and challenges in enhancing EU China relations through a comparative in depth investigation of the processes practices and politics of EU China climate change and agricultural trade relations over the past two decades The book draws on a rich collection of original data encompassing over 100 interviews with stakeholders of EU China relations conducted from 2015-2023 strengthened by participant observation at EU and Chinese institutional headquarters and in diplomatic fora that has taken place over the past ten years Enriching these data are newly disclosed official minutes and documentation regarding EU China negotiations and cooperation This book will be of much interest to students of diplomacy studies Chinese politics EU politics and international relations in general Constructing Post-Soviet Geopolitics in Estonia Pami Aalto,2013-09-13 This work examines the construction of post Soviet political space geopolitical discourses and boundaries in Estonia Making use of innovative methodological solutions such as Q methodology its analysis includes in depth interviews that elucidate a variety of issues through human experience and subjective perception such as Estonian Russian border disputes of the 1990s inter ethnic issues and national integration and security As

Estonia is one of the frontline EU accession countries and is queuing for membership of NATO the book raises broad questions of post Soviet geopolitics in the Baltic region and across Europe Indeed Pami Aalto argues that small states such as Estonia should be understood as active participants in post Soviet and European geopolitics and not simply pawns in a superpower environment
