Elt Methods and Approaches: Experiments and Observations Taj Mohammad, Soada Idris, 2022-05-16

ELT METHODS AND APPROACHES EXPERIMENTS AND OBSERVATIONS narrates the experiments and observations of different methodological approaches in English Language Teaching. The beginning of each chapter provides a conceptual framework of each method and approach supported by well known critics and scholars in the field. Such a theoretical background to most of the methods and approaches in English Language Teaching may attract students, research scholars, and classroom teachers. The book shares personal experiences in writing this book, an amalgam of theory and practice in English Language Teaching. They emphasize the application of those methods and approaches in a particular EFL/ESL situation. That is what seemed to motivate me to write this book, a different source in that it not only provides the conceptual framework of different methods, approaches, and techniques but also executes and experiments with them in EFL/ESL situations. The work is unique as it not only experiments with different methods and approaches but also observes what practical challenges learners and teachers face during their implementation as well as how these difficulties can be addressed and overcome. This text has provided adequate scope for learners, the target group, to integrate them into the research. They have actively participated in the creation and formation of this book. The book has positively included learners' feedback on the execution, approach, and technique. Their feedback is important in assessing whether a method or approach is successful in a specific EFL/ESL environment. Learners' feedback has assisted the authors as they present, discuss, and assess the advantages and disadvantages of each method. We have shared personal experiences with different EFL/ESL learners in three countries: the United States of America, Saudi Arabia, and India.

ELT in Asia in the Digital Era: Global Citizenship and Identity Suwarsih Madya, Fuad Hamied, Willy A. Renandya, Christine Coombe, Yazid Basthomi, 2018-06-27

This proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era's impact on English teaching in non-English speaking countries. English used in the global environment, the frequent mobile communication, and the use of AI-based translators are bringing about dramatic changes in our English language learning and teaching. Who can provide us the wisdom to know what to do? Those scholars going through these complex environmental changes. A collection of puzzle pieces may bring us a better contour for the future than a perfectly edited book. It's indeed a pleasure reading these insightful pieces to gain wisdom for the future of ELT practices in global contexts.
