Space Age:

The Long Space Age Alexander MacDonald, 2017-04-25 An economic historian traces uncovers the story of privately funded space exploration from early 19th century astronomical observatories to SpaceX The standard historical narrative of American space exploration begins during the Cold War with the federal government's efforts to beat the Soviet Union in the Space Race Given this framing the more recent emergence of private sector space exploration appears to be a new and controversial phenomenon But as Alexander MacDonald argues in *The Long Space Age* privately funded space exploration had been happening in the United States long before we tried to put a man on the moon Since the early 19th century private observatories had been making discoveries and developing technologies that led directly to NASA's epochal 20th century achievements And their efforts were no less ambitious for their time than SpaceX and Blue Origin are in today's resurgent space industry *The Long Space Age* examines the economic history of this centuries long development from those first American observatories to the International Space Station

The New Space Age #4 Kenny Porter, 2026-03-25 After a crushing blow from the U S Government Mark and Stacey are shaken to their core But as Mark tries to put the pieces of his deep space rescue mission back together Bobby's betrayal leads to a horrifying new discovery a drone version of their ship armed to the teeth and ready to kill

A Dictionary of the Space Age Paul Dickson, 2009-04-14 The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement As television news anchors radio hosts and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What's more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster's Third New International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs Book Jacket
