Goal Setting and Its Influence on Achievement in the Spanish Language Classroom Alyssia Miller, 2018 The present study employs an interdisciplinary approach that bridges theories from second language acquisition education and psychology and centers on finding new techniques to help students learn In this study I examined goal orientations goal setting and the effects on achievement in beginning level Spanish language learners Firstly I defined language achievement as three fold consisting of final course grades intercultural competence and linguistic competence Then in nine sections of a beginning level Spanish course I employed five steps of goal setting a process that I have coined the 5 As They are articulation action assessment adherence and achievement Results show that in the main goal orientation categories which consist of mastery performance approach and avoidance mastery goals and approach goals were the most common The mastery approach goal orientation was the most common goal type when using a 2 x 2 framework which compares mastery approach mastery avoidance performance approach and performance avoidance Analysis of participants written goal statements showed communication speaking grammar and listening comprehension as the main areas that participants wanted to master in their Spanish course Considering the effects on achievement results indicate that students who followed this process of the 5 As and actively set goals had statistically significant higher final course grades as compared to the control group p 034 Further analysis of these results revealed a significant difference between the control group and the approach goal orientations p 020 In terms of intercultural competence development results suggest that students did not develop intercultural and this was independent of whether they set a goal or not Participants also did not believe that learning culture was a necessary part of language learning Regarding linguistic competence development there were statistically significant interactions but the main effects and post hoc analyses only revealed significance between the

pre and posttest scores in the control group who significantly decreased  $p = .050$  and the pre and posttest scores in the avoidance group who significantly increased  $p = .024$ . This study also demonstrates the positive benefits gleaned from the goal setting process. These include increased attentiveness, awareness, engagement, language learner autonomy, motivation, self-efficacy, and self-regulation. As such, the results of this study can and should be implemented into the standards, curricula, and textbooks in order to have students become an active part of the learning process.

**Toolkit for Counseling Spanish-Speaking Clients** Lorraine T. Benuto, 2017-11-14. This timely practical reference addresses the lack of Spanish language resources for mental health professionals to use with their Latino clients. Geared toward both English and Spanish speaking practitioners in a variety of settings, this volume is designed to minimize misunderstandings between the clinician and client and with that the possibility of inaccurate diagnosis and/or ineffective treatment. Coverage for each topic features a discussion of cultural considerations, guidelines for evidence-based best practices, a review of available findings, a treatment plan, plus clinical tools and client handouts, homework sheets, worksheets, and other materials. Chapters span a wide range of disorders and problems over the life course and include reproducible resources for assessing for race-based trauma, using behavioral activation and cognitive interventions to treat depression among Latinos, treating aggression, substance use, abuse, and dependence among Latino adults, treating behavioral problems among Latino adolescents, treating anxiety among Latino children, working with Latino couples, restoring legal competency with Latinos. The *Toolkit for Counseling Spanish-Speaking Clients* fills a glaring need in behavioral service delivery, offering health psychologists, social workers, clinical psychologists, neuropsychologists, and other helping professionals culturally relevant support for working with this underserved population. The materials included here are an important step toward dismantling barriers to mental health care.

**Kids Learn! Getting Ready for High School (Spanish Support)** Carina Adra, Darlene Misconish Tyler, 2022-04-01. *Blackwell's Five-Minute Veterinary Practice Management Consult* Lowell Ackerman, 2019-10-16.
