The Creative Process

Michele Cassou

The Creative Process:

The Creative Process Brewster Ghiselin, 1952 Interest in the creative process isn't new. Both Plato and Aristotle discussed its intricacies and so have many others over the past two thousand years. This unusual collection provides a lively sampling of what 38 writers, artists, and scientists have had to say about creativity. While not always comforting, their remarks offer new ways of understanding the creative struggle. Discipline and hard work are clearly integral to the process, but as editor Brewster Ghiselin notes, so too is listening to the voice of eccentricity within ourselves and in the world. The Creative Process Charlotte L. Doyle, 2021-12-22 *The Creative Process: Stories from the Arts and Sciences* asks how celebrated works of art and breakthroughs in science came to be. What was the first inkling? What were the steps and missteps along the way? How was the process experienced by the creative person as it proceeded? And what are the implications for the psychology of the creative process? Each chapter focuses on a specific creative endeavor, situating the work in the context of domain culture and historical era. Then it traces the development of the work from what we know of its beginnings to its fulfillment. Qualitative materials—interviews, notebooks, diaries, sketches, drafts, and other writings—allow a story of the creative process as lived to emerge. The narratives exemplify established concepts in the psychology of creativity, propose broadening some, reveal the need for modification, and suggest new ones. Application of phenomenological frameworks illuminates the episodes in new ways, as well. The case study approach proves again that each episode is unique, yet themes and variations come into view when the episodes are considered together in a final reflection. From Darwin's theory to an unusual jazz sound, here are 11 fascinating stories of how specific works took shape. Psychologists, students interested in creativity, and all those intrigued by the process in any creative field will find this book essential reading. *The Creative Process* Todd Lubart, 2018-08-29

The creative process refers to the sequence of thoughts and actions that are involved in the production of new work that is both original and valuable in its context. This book examines this process across the domains of visual art, writing, engineering, design, and music. It characterizes each domain's creative process based on evidence stemming from creators' accounts of their own activity and a wide range of observational material and theories specific to each field. Results from empirical research are then presented across a set of closely linked chapters using a common set of methodologies that seek to trace the creative process as it unfolds. This highly interdisciplinary edited collection offers valuable insight into the creative process for scholars and practitioners in the fields of psychology, education, and creative studies, as well as for any other readers interested in the creative process. Todd Lubart brings together a group of authors who are themselves actively involved in their respective creative fields and invites readers to adopt a broad perspective on the creative process in order to unravel some of its mysteries.

The Creative Process in the Individual Thomas Troward,2003 **The Creative Process in the Individual** T. Troward,2018-01-03 What is creativity Without creative powers mankind would still be living in caves without any new ideas or advancement so it is important to understand and harness this power Thomas Troward in his book The Creative Process in the Individual has endeavoured to set before the reader the conception of a sequence of creative action commencing with the formation of the globe and culminating in a vista of infinite possibilities attainable by everyone who follows up the right line for their unfoldment The Creative Process in the Individual starts with certain incontrovertible scientific facts all these things logically follow and that therefore however far these speculations may carry us beyond our past experience they nowhere break the thread of an intelligible connection of cause and effect This is an excellent book for those who are fans of the writings of works by Thomas Troward and should not be passed up by individuals who have read his works and similar works from the New Thought movement

The Creative Process Brewster Ghiselin,2005 The Storm of Creativity Kyna Leski,2020-08-11 The stages of the creative process from unlearning to beginning again seen through examples from the practice of artists architects poets and others Although each instance of creativity is singular and specific Kyna Leski tells us the creative process is universal Artists architects poets inventors scientists and others all navigate the same stages of the process in order to discover something that does not yet exist All of us must work our way through the empty page the blank screen writer's block confusion chaos and doubt In this book Leski draws from her observations and experiences as a teacher student maker writer

and architect to describe the workings of the creative process Leski sees the creative process as being like a storm it slowly begins to gather and take form until it overtakes us if we are willing to let it It is dynamic continually in motion it starts stops rages and abates ebbs and flows In illustrations that accompany each chapter she maps the arc of the creative process by tracing the path of water droplets traveling the stages of a storm Leski describes unlearning ridding ourselves of preconceptions only when we realize what we don't know can we pose the problem that we need to solve We gather evidence with notebook jottings research the collection of objects propelling the process We perceive and conceive we look ahead without knowing where we are going we make connections We pause retreat and stop only to start again To illustrate these stages of the process Leski draws on examples of creative practice that range from Paul Klee to Steve Jobs from the discovery of continental drift to the design of Antoni Gaudí's Sagrada Família Creativity Leski tells us is a path with no beginning or end it is ongoing This revelatory view of the creative process will be an essential guide for anyone engaged in creative discovery
