Godwell Nhamo, Vuyo Mjimba, 2019-12-19 *The Green Building Evolution* illuminates global examples and makes use of case studies mainly from South Africa. This book is in five parts. Part I is a single introductory chapter centred on the evolution of the green building movement. Part II addresses the green building terrain. Part III presents selected case studies. Part IV focuses on chapters that address pushing the boundaries in the green building space while Part V presents emerging trends and policy perspectives. Further details are contained in the main body of the book. It is our sincere hope that readers will experience the book as an informative and ground breaking adventure. Written by 14 authors from different academic disciplines and areas of specialisation, the book comes as the sixth in a series that addresses global and national concerns on climate change, sustainable development and the green economy transition agenda. The book series is conceptualised and coordinated by the Exxaro Chair in Business and Climate Change led by Prof Godwell Nhamo and hosted by the Institute for Corporate Citizenship ICC at the University of South Africa UNISA. The books are published by the Human Sciences Research Council HSRC through the Africa Institute of South Africa.

### **Green Building Management and Smart Automation**

Solanki, Arun, Nayyar, Anand, 2019-07-05 Throughout the world there is an increasing demand on diminishing natural resources in the industrial, transport, commercial and residential sectors. Of these, the residential sector uses the most energy on such needs as lighting, water heating, air conditioning, space heating and refrigeration. This sector alone consumes one third of the total primary energy resources available. By using green building and smart automation techniques, this demand for energy resources can be lowered. *Green Building Management and Smart Automation* is an essential scholarly publication that provides an in depth analysis of design technologies for green building and highlights the smart automation technologies that help in energy conservation along with various performance metrics that are necessary to facilitate a building to be known as a Green Smart Building. Featuring a range of topics such as environmental quality, energy management and big data analytics, this book is ideal for researchers, engineers, policymakers, government officials, architects and students.

*The Decarbonization Imperative* Michael Lenox, Rebecca Duff, 2021-10-19 Time is of the essence. Climate change looms as a malignant force that will reshape our economy and society for generations to come. If we are going to avoid the worst effects of climate change, we are going to need to effectively decarbonize the global economy by 2050. This doesn't mean a modest or even a drastic improvement in fuel efficiency standards for automobiles. It means 100 percent of the cars on the road being battery powered or powered by some other non-carbon emitting powertrain. It means 100 percent of our global electricity needs being met by renewables and other non-carbon emitting sources such as nuclear power. It means electrifying the global industrial sector and replacing carbon intensive chemical processes with green alternatives, eliminating scope one emissions in production across all industries, particularly steel, cement, petrochemicals, which are the backbone of the global economy. It means sustainable farming while still feeding a growing global population. Responding to the existential threat of climate change, Michael Lenox and Rebecca Duff propose a radical reconfiguration of the industries contributing the most

and most harmfully to this planetary crisis Disruptive innovation and a particular calibration of industry dynamics will be key to this change The authors analyze precisely what this might look like for specific sectors of the world economy ranging from agriculture to industrials and building energy and transportation and examine the possible challenges and obstacles to introducing a paradigm shift in each one With regards to existent business practices and products how much and what kind of transformation can be achieved The authors assert that markets are critical to achieving the needed change and that they operate within a larger scale of institutional rules and norms Lenox and Duff conclude with an analysis of policy interventions and strategies that could move us toward clean tech and decarbonization by 2050

## Top Green Building Introduction

In the digital age, access to information has become easier than ever before. The ability to download Top Green Building has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Top Green Building has opened up a world of possibilities. Downloading Top Green Building provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Top Green Building has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Top Green Building. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Top Green Building. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Top Green Building, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Top Green Building has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
