You will be so many things, and
the one thing that I wish I'd
known and want to say is, don't
just be yourself. Be all of
yourselves. Don't just live. Be that
other thing connected to death.
Be life. Live all of your life.
Understand it, see it, appreciate
it. And have fun.

Wisdom For Graduates:

The Gift of Wisdom for Graduates Logan Thatcher,2019-05-11 This book contains a hundred beautifully designed pages along with a 100 quotes about wisdom specifically selected for 2019 graduates A common cliché graduates hear is Welcome to the real world Even though that might rightfully prompt an eyeroll it doesn't mean it's not true Education is a worthwhile pursuit but now it's time to put that big brain to use And there is no better way to keep a head full of knowledge out of the clouds than by cultivating a little bit of wisdom *Look Out, World* Tom Burns,2006-03 Over 60 cheerful often whimsical black and white full page photos alternate with words of wit and wisdom that focus on the theme of graduation from high school or college These thoughts mantras and adages capture the joy and anticipation of graduates as they celebrate and look forward to the future *Professional Wisdom* James Stellar,Brandy Eggan,2025-08-26 Higher education has a long history of transferring knowledge facts and theories into students minds However it has less of a history of providing students with direct experiences such as internships that lead to felt knowledge of the field and relevant skills It is this combination of academic and felt knowledge that fosters the growth students need which we refer to as professional wisdom This growth state is supported by basic neuroscience Humans possess a crowning achievement of evolution in the neocortex allowing us to perform amazing feats of cognitive symbolic logic such as language and planning Beneath the neocortex lies an older part of the brain that regulates emotional computation the limbic system This system provides a perspective of value helping us determine whether a plan or activity is beneficial Interestingly neuroscience shows that the limbic system reacts most strongly to actual experiences and it requires reflection to process these experiences into the higher cognitive regions of the brain When applied to higher education this insight suggests that combining academic study with hands on experiences such as cooperative learning and internships can lead to a lifelong career where students remain passionate and engaged A major paired with an enjoyable real world experience in college helps students connect knowledge with purpose fostering long term satisfaction and success While some individuals especially in academic administration refer to this as educating the whole student we describe it as cognitive emotional integration the foundation of professional wisdom In this book we explore the current experiences in higher education that foster this development from cooperative learning to internships and beyond We also offer two neuroscientists perspectives on how cognitive emotional integration aligns with the brain's natural processes With this understanding we believe colleges and universities have an obligation to their students to cultivate environments that challenge them both inside and outside the classroom Without this we risk graduating learners unprepared for the demands of the modern workforce **Handbook of Organizational and Managerial Wisdom** Eric H.
