Bibliographical List of the Works that Have Been Published Walter William Skeat, 1877 **Multilingualism in the Middle Ages and Early Modern Age** Albrecht Classen, 2016-09-12 Bi and multilingualism are of great interest for contemporary linguists since this phenomenon deeply reflects on language acquisition language use and sociolinguistic conditions in many different circumstances all over the world Multilingualism was however certainly rather common already if not especially in the premodern world For some time now research has started to explore this issue through a number of specialized studies The present volume continues with the investigation of multilingualism through a collection of case studies focusing on important examples in medieval and early modern societies that is in linguistic and cultural contact zones such as England Spain the Holy Land but also the New World As all contributors confirm the numerous cases of multilingualism discussed here indicate strongly that the premodern period knew considerably less barriers between people of different social classes cultural background and religious orientation But we also have to acknowledge that already then human communication

could fail because of linguistic hurdles which prevented mutual understanding in religious and cultural terms

Skeat, 1877 *Taking a Common Concern Approach to Economic Inequality* Alexander D. Beyleveld, 2022-03-16 The open access publication of this book has been published with the support of the Swiss National Science Foundation Are countries capable of reducing economic inequality under conditions of contemporary globalisation without cooperating and coordinating with other countries While states are far from powerless to effect distributional change within their own sovereign space Taking a Common Concern Approach to Economic Inequality makes the case that cooperation and coordination is indeed necessary especially in relation to corporate taxation It accordingly contemplates the utility of a transnational taxation system that is embedded in cooperative sovereignty through the recognition of rising economic inequality and its deleterious effects including how increasingly unequal distributions within countries make transnational cooperation and coordination efforts less likely as a common concern of humankind
