*Resistance and Revolution in China* Tetsuya Kataoka, Kataoka Tetsuya, 1974-01-01 The spectacular expansion of the Communist forces during the Sino Japanese War is represented as a demonstration of the effectiveness of Maoist strategy Mr Kataoka shows that in reality the Chinese Communist movement had been rurally oriented as early as 1928 and that the Communists flight from Kiangsi to Yen-an therefore constituted an indictment of Maoism Drawing on captured Communist documents that he studied in Taiwan Mr Kataoka details the process of land distribution and construction of military bases behind the protection afforded by the war He ends his account in 1943 when Yen-an was preparing for armed insurrection against Chungking Dust jacket

Philipp, Barbara E. Armstrong, Bonnie P. Schappelle, 1998-07-16 The outcome of a two year investigation this book shows how teachers understanding of the mathematics of number quantity and proportion influences how they teach and what their students learn of the concepts skills and reasoning associated with this mathematical domain of knowledge It grew out of the recognition of the need to understand the complexities of helping teachers reconceptualize the mathematics they teach and the resulting effects in their classrooms The book includes case studies of five teachers from different types of school settings illustrating changes in the teachers teaching methods expectations of students and beliefs about the role of professional development **Michigan All-time Athletic Record Book**, 1968

Children's Reasoning While Building Fraction Ideas Carolyn A. Maher, Dina Yankelewitz, 2017-06-10 This book may be used for research graduate and undergraduate teacher education and teacher development It presents an integrated set of studies of a heterogeneously grouped class of twenty one nine year olds engaged in exploring fraction ideas prior to classroom instruction under conditions that supported investigation collaboration and argumentation It demonstrates with text and video narrative how young children can reason about mathematics in surprisingly sophisticated ways when provided the opportunity to do so in the proper classroom environment In this volume fourth grade students reasoning about fraction concepts is described through careful analysis and accompanying video excerpts showcasing the variety and originality of their thinking These children will serve as an inspiration for educators to encourage the development of reasoning and argumentation in their students as part of a mathematics curriculum designed to produce critical thinkers

*Providing a Foundation for Teaching Mathematics in the Middle Grades* Judith Sowder, Bonnie P. Schappelle, 1995-08-03 This book is written primarily for middle grade teachers who are discovering that they now want to teach in ways that create positive mathematical learning environments and instigate rich classroom discourse Many of these teachers are finding that their mathematical preparation did not address the complexities underlying the mathematics they now want to teach In Part One the authors provide a foundation for the mathematics of these grades particularly the mathematics that grows out of

concepts of number quantity and arithmetic operations In Part Two through three case studies the authors demonstrate to teachers how a deeper understanding of the mathematics they teach can enhance classroom instruction The book interweaves research and classroom practice Mathematics teacher educators researchers curriculum developers textbook authors and supervisors of mathematics programs will find this book to be useful Teachers both prospective and practicing will benefit most from this book when the chapters are used as catalysts for discussion in classes or professional development programs
