

Preface

This book is for my programmer friends who are hackers at heart, but want to learn design on the side. It is a great place to start if you want to be a pro at web design. Or if you just want to be “not horrible” at web design, it’s good for that too :)

The lessons in here are meant to be practical. Too many design books think you need to know the history of design before doing it. Focey, I say.

I encourage you to approach each chapter as if you were learning a new programming language. For example, look at the examples in the typography chapter and try to mimic the leading (letter-spacing) in the examples. Pick a style from the style chapter and try to recreate it. Pick a color palette for your project based on the principles of color theory mentioned in the color chapter.

Each of these are your own little “Hello World” experiments.

Once you’re more comfortable, try your hand at the exercises at the end of the book. How will you know if your experiments get compiled correctly? Compare it to work you admire online. But only the parts you’re experimenting with. That’s important. It’s easy to get overwhelmed if you compare your small typography experiment to a fully completed site on Dribbble.

Additionally if you’re struggling with something and need some feedback, hit me up! I’m at hello@designbynumbers.io.

kind regards, Mason
