

SUMMARIZING AND MAIN IDEA

Read the given passage and answer the questions.

The human population in Africa has increased rapidly, causing a growing demand for farmland. This demand for land has caused the natural habitat of elephants to shrink. As a result, elephants have less space to roam, meaning they come into contact with humans more frequently. Farmers' fields and crops are often disturbed by these wandering elephants, leading to conflict between humans and elephants. More often than not, it is the elephants who lose. Logging and mining industries are also responsible for the declining numbers of elephants. Both of these practices destroy elephants' natural habitat, making it more and more difficult for these animals to survive.
