Chiara Ruini, 2017-02-17 This book builds the bridge between the fields of clinical and positive psychology research and practice It presents a variety of interventions aimed at promoting positivity in clinical populations Although clinical psychology has addressed issues such as happiness resilience and optimal functioning the field has stuck to the medical model and paid more attention to distress and negativity in human existence Positive psychology on the other hand has been

considered a psychology for all and has devoted attention and resources to the investigation of positivity in general populations Only recently the relationships between positivity distress and psychopathology have been investigated This book integrates research and practice from both fields Its first part provides a theoretical framework for describing concepts such as hedonic and eudaimonic wellbeing resilience character s strengths positive health and positive functioning with a special reference to their clinical implications and their psychosomatic underpinnings The second part provides a review of positive interventions in clinical practice and psychotherapeutic settings These interventions are derived from positive psychology as well as from longstanding traditions in clinical psychology and psychiatry and from eastern clinical and philosophical approaches

Positive psychology in the workplace. Analysis of influencing factors on the development of managerial resilience Mira Knauer,2024-05-08 Master s Thesis from the year 2023 in the subject Business economics Miscellaneous grade 1 2 Cologne Business School K In language English abstract Due to global events such as the COVID 19 pandemic or the war in Ukraine organizations are facing unprecedented challenges and crises requiring their managers to be resilient deal with stress and setbacks and maintain high performance levels while leading their teams Therefore this thesis investigated factors and appropriate interventions that can strengthen managerial resilience The current state of research and existing interventions in the work context were examined followed by qualitative interviews with ten participants working in companies in comparable industries in Germany Thematic data analysis identified two main factors that strengthen resilience individual support and resources including support from colleagues external networks and mentors and overarching working conditions such as promotion of competence development transparent communication and constructive collaboration Thereby the most crucial factor identified was social support which indicates that organizations need to prioritize creating an environment that encourages social connections and fosters supportive relationships Future research could focus on the effectiveness of different types of social support or extend the qualitative study with quantitative research to determine if the same factors apply to a representative number of managers
