STOMP

Stopping The Over Medication of People with a learning disability, autism or both

What is STOMP?

These medicines are used to treat mental health conditions.

Sometimes they are also given to people because their behaviour is seen as challenging.

People with a learning disability, autism or both are more likely to be given these medicines than other people.

These medicines are right for some people. They can help people stay safe and well.

Sometimes there are other ways of helping people, so they need less medicine or none at all.

STOMP is about everyone working together to make sure people get the right medicine when they need it.

It is also about making sure that people get the other support they need so that they don't need this sort of medicine.
