**Human Rights in Chinese Thought** Stephen C. **The Design of Virgil's Bucolics** John Van Sickle,1978 Among the many recent studies of the Bucolics none has dealt systematically with the evidence newly broached by modern scholarship that Virgil s book may be a single unified composition in which the ten eclogues rather than separate poems gathered and arranged are parts worked out expressly for their places and differentiated functions in the whole The present study emphasizing the need for considered method approaches the book s unity first in terms of theme It shows that Virgil deployed themes in three registers a bucolic a georgic and a civic heroic that develop and systematically vary through all the eclogues in the order of the book A thematic system thus emerges in the book as a whole It may share the traditional functions of rhetoric and music at the level of performance but it is shown also to articulate on reflective reading an ambitious design in poetics Through it Virgil reckons with the entire tradition of epos which he recasts from two modes into three Hesiodic Homeric bucolic Hesiodic Homeric He thus establishes the tripartite frame for his life s work with its ultimate

emulation of Homer In the process through the successive eclogues he also gradually transforms the bucolic mode from Sicilian Theocritean to Arcadian This he conceives as a return to the source hence a new beginning that outdoes Theocritus
