The Barter:

The Barter Siobhan Adcock,2014-09-04 A heart stopping tale as provocative as is suspenseful about two conflicted women separated by one hundred years and bound by an unthinkable sacrifice The Barter is a ghost story and a love story a riveting emotional tale that also explores motherhood and work and feminism Set in Texas in present day and at the turn of the twentieth century the novel follows two young mothers at the turning point of their lives Bridget has given up her career as an attorney to raise her daughter joining a cadre of stay at home mothers seeking fulfillment in a quiet suburb But for Bridget some crucial part of the exchange is absent Something she loves and needs And now a terrifying presence has entered her home only nobody but Bridget can feel it On a farm in 1902 a young city bride takes a farmer husband The marriage bed will become both crucible and anvil as Rebecca first allows then negates the powerful erotic connection between them She turns her back on John to give all her love to their child Much will occur in this cold house none of it good As Siobhan Adcock crosscuts these stories with mounting tension each woman arrives at a terrible ordeal of her own making tinged with love and fear and dread What will they sacrifice to save their families and themselves Readers will slow down to enjoy the gorgeous language then speed up to see what happens next in a plot that thrums with the weight of decision and its explosive consequences

The financial crisis. A critical analysis of its causes and consequences Tim Borneck,2016-04-15 Seminar paper from the year 2015 in the subject Economics Finance grade 1 7 University of Applied Sciences Essen language English abstract In 2007 the biggest financial crisis after the Great Depression of 1939 took place One theoretical framework explaining financial crises of that kind was envisioned by Hyman P Minsky 1919 1996 in the latter half of the 20th century and was not considered in this context for a long time The most prominent part of the theoretical framework the financial instability hypothesis FIH emphasises that modern capitalist system is prone to bouts of relative instability and financial collapse When

the storm in 2007 broke it was discovered again and the world began to talk about a Minsky moment Prominent economics called the theory a required reading and championed it as visionary Therefore it is no surprise that the book about his FIH was traded at prices over 2000 US right after the financial crisis Until the year 2007 the economic world followed another school of thought The so called neoclassic described a world in which financial crises would only occur if exogenous shocks would disturb the self regulating power of the markets In detail this is called the efficient market hypothesis EMH In addition means this that financial crises caused by systemically reason are not part of the theoretical model On the contrary Minsky described a cyclical model which tries to implement loan relationships financial institutions financial innovations and uncertainty in the analysis of the modern capitalism An emphasis lays on the financing structure of different economic players and the role of financial institutions regarding their influence on the real economy Minsky's theory is based on the whole economic cycle and really tries to explain how financial crises are actually caused Additionally other authors see the thoughts of Minsky as an acknowledged theory regarding financial crises in the past Although all these factors make the theory interesting for the recent crisis and different economics had called the financial crisis a Minsky moment a huge discussion if the theory is really applicable came up Further if the theory is really applicable the next question would be which consequences have been drawn in order to prevent another crisis
