The Boy Who Wasn't There K M Peyton,2013-01-30 Thirteen year old Arnold is always getting into trouble but nowhere near as serious as when he sees a dead body floating in a lake He s the only witness to this crime and now someone is trying to kill him too *The Girl Who Wasn't There* Ferdinand von Schirach,2015-01-08 Sebastian von Eschburg scion of a wealthy self destructive family survived his disastrous childhood to become a celebrated if controversial artist He casts a provocative shadow over the Berlin scene his disturbing photographs and installations show that truth and reality are two distinct things When Sebastian is accused of murdering a young woman and the police investigation takes a sinister turn seasoned lawyer Konrad Biegler agrees to represent him and hopes to help himself in the process But Biegler soon learns that nothing about the case or the suspect is what it appears The new thriller from the acclaimed author of *The Collini Case* **THE GIRL WHO WASN T THERE** is dark ingenious and irresistibly gripping **The Man Who Wasn't There** Anil

Ananthaswamy,2016-08-02 In the tradition of Oliver Sacks science journalist Anil Ananthaswamy skillfully inspects the bewildering connections among brain body mind self and society by examining a range of neuropsychological ailments from autism and Alzheimer s to out of body experiences and body integrity identity disorder Award winning science writer Anil Ananthaswamy smartly explores the concept of self by way of several mental conditions that eat away at patients identities showing we learn a lot about being human from people with a fragmented or altered sense of self Ananthaswamy travelled the world to meet those who suffer from maladies of the self interviewing patients psychiatrists philosophers and neuroscientists along the way He charts how the self is affected by Asperger s autism Alzheimer s epilepsy schizophrenia among many other mental conditions revealing how the brain constructs our sense of self Each chapter is anchored with stories of people who experience themselves differently from the norm Readers meet individuals in various stages of Alzheimer s disease where the loss of memory and cognition results in the loss of some aspects of the self We meet a woman who recalls the feeling of her first major encounter with schizophrenia which she describes as an outside force controlling her Ananthaswamy also looks at several less familiar conditions such as Cotard s syndrome in which patients believe they are dead and those with body integrity identity disorder where the patient seeks to have a body part amputated because it doesn t belong to them Moving nimbly back and forth from the individual stories to scientific analysis *The Man Who Wasn t There* is a wholly original exploration of the human self which raises fascinating questions about the mind body connection
