The Role of the Principal in Staff Development Thamsanqa Thulani Bhengu, 1999 The Role of the Principal in Educator Professional Development Teboho Edward More, 2016 The study investigated how principals discharge their responsibilities with regard to educator professional development and what factors if any assist or hinder principals in the execution of their responsibilities for educator professional development The following research question informs this study What role do principals play in educator professional development in secondary schools in Gauteng Province The theoretical framework used in this study is that of human capital theory In the words of Van Loo and Rocco 2004 99 human capital theory is an economic approach to the evaluation of the costs and benefits of the investment in skills and knowledge and in this regard it implies investment in people themselves in education and training with a view to enhance economic productivity and competence in this case educational output The study followed a qualitative research design wherein data were collected through semi structured interviews with principals and two educators in four secondary schools two fee paying and two no fee paying schools in Gauteng Province The sampling method used was convenience sampling because of practical constraints namely time and costs involved This study found that principals do play a role though not appropriately in educator professional development in secondary schools In some schools it was found that proper management of professional development programmes was non-existent and this led to educators being not clearly sure of what role their principals play exactly in their professional development Principals indicated that most professional development activities were carried out by the district offices Some principals were not certain of what the scope of professional development entails and in this way they were not quite sure where exactly development was required It became evident that the Integrated Quality Management System IQMS as a

developmental tool was reported not to be efficiently implemented in most schools in this study and challenges faced were also attributed to poor management of the process by the Staff Development Team SDT including the principals *The Training and Development of School Principals* Ward Sybouts, Frederick C. Wendel, 1994-12-08 The school principalship is one of the most demanding and misunderstood jobs in American education This professional reference offers practical advice on how to perform that job successfully The volume overviews the efficient management of resources the importance of strategic planning and the legal and business concerns that principals must face The book also emphasizes the role of the principal as a leader in the educational community

Department of Education, 2007 Educational organizations thrive on the impact and support of professional development programs that enhance the learning environment of the school Schools are now considered as learning communities whereby the principal

teachers and students are all engaged in an ongoing process of learning based on collaboration and trust. The traditional professional activities of teacher development have shifted to a more integrated approach whereby the principal is part of the development and not isolated from the experience. Research shows that theories on school leadership and the principal's role in relation to adult learning suggests that adult development can be supported in four possible ways by creating a sound school culture emphasizing teacher learning, building interpersonal relationships and focusing on teacher personal growth and development. Drago-Severson 2004. To support teacher development principals need to take an active role in the initiation and implementation of strategies and approaches including collaborative inquiry, mentoring, teaming and direct assistance or what Tharp and Gallimore refer to as the chain of assistance to achieve an ongoing learning community. Lieberman and Miller 2001 as cited in Drago-Severson emphasize the need for developing a better understanding of what principals do to facilitate teacher development as well as how they do it. My research assessed the principal's role and its influence on professional development in a Lebanese private school and examined some representative approaches used in maintaining successful learning communities.

The Principalship

Frederick C. Lunenburg, Beverly J. Irby, 2022-08-04. Today's emphasis on student learning outcomes coupled with federal legislation to that end has placed more demands on the role of the principal than ever before in our nation's history. To address the heightened demands for greater accountability for student learning, *The Principalship* uses a learning-centered approach, one that emphasizes the role of the principal as the steward of the school's vision, learning for all. The critical aspects of the teaching-learning process are addressed here, including student motivation, individual differences, classroom management, assessing student learning and developing, maintaining and changing school culture. In addition, several topics not found in other principalship texts are addressed, including school safety, special education, gifted education, bilingual education, nontraditional organizational structures, gender-inclusive theories, diversity, ethics, political and policy context, human resource management, legal issues and collective bargaining. The book is
