Corporate Social Responsibility, Accountability and Governance Istemi Demirag, 2018-10-08 The business case for corporate social responsibility which suggests that socially and environmentally aware companies can expect to reap financial rewards is seemingly gaining widespread acceptance within the business community This is particularly apparent in the ever increasing number of prominent companies parading their social ethical and environmental credentials by producing paper or web based social and environmental or sustainability reports In so doing reporting companies claim they are demonstrating a clear commitment to transparency and accountability to their key stakeholder groups However in the prevailing voluntaristic business case centred climate within which such initiatives are taking place little thought appears to have gone into the question of how stakeholders other than the capital provider group can actually use corporate disclosures offered in order to hold management accountable for the social and environmental consequences of their actions While much corporate rhetoric abounds concerning notions of stakeholder dialogue and engagement rigorous analysis of the governance implications of their claimed commitment to the principles of corporate social responsibility is largely conspicuous by its absence Corporate Social Responsibility Accountability and Governance seeks to explore this missing link between CSR and associated reporting initiatives and governance mechanisms that are capable of embracing true stakeholder accountability A wide range of case studies drawing on experiences of both public and private sector initiatives in Europe the United States Canada South America and Asia offer insightful analysis of the complex relationships between the state the market and civil society in the development of CSR accountability and sustainable development The book employs a multidisciplinary perspective in order to analyse the political social economic technological legal and organisational shaping of CSR The complexities underpinning the concept are thereby clearly drawn out and the gross oversimplifications inherent in the prevailing consultancy driven business case literature painfully exposed Above all the book offers a sound practically and theoretically informed contribution to public policy debate and reflects and builds on urgent calls from public and private sector policy makers as well as academics to develop better governance and accountability frameworks for business to deal with the imperatives of social responsibility sustainable development and ethics This book is divided into five parts In Part 1 the complex concepts of responsibility accountability and governance are discussed and in particular the presumed relationships between the state the market and civil society in improving accountability and governance are explored and critiqued Part 2 consists of chapters relating to corporate social responsibility and stakeholder theory Part 3 is concerned with empirical studies covering governance structures networking and corporate social responsibility Part 4 deals with corporate governance and its implications for

regulators and civil society Part 5 discusses multinational companies and how they impact on national governance regimes Finally a summary is provided with emerging international patterns of accountability and governance structures Corporate Social Responsibility Accountability and Governance will be essential reading for public and private policy makers and practitioners and academics interested in how CSR can become more than a soundbite and rather a substantial force for better global corporate governance and accountability

Environment and Planning, 2005 **Environment & Planning**, 2005-07 *Environmental Management* Chris Barrow, 2024-04-29 This comprehensively updated third edition explores the nature and role of environmental management and offers an introduction to this rapidly expanding and changing field It focuses on challenges and opportunities and core concepts including sustainable development The book is divided into five parts Part I Introduction to Environmental Management four introductory chapters cover the justification for environmental management its theory scope goals and scientific background Part II Practice explores environmental management in economics law and business and environmental management's relation with environmentalism international agreements and monitoring Part III Global Challenges and Opportunities examines resources challenges and opportunities both natural and human caused or human aggravated Part IV Responses to Global Challenges and Opportunities explores mitigation vulnerability resilience adaptation and how technology social change and politics affect responses to challenges Part V The Future the final chapter considers the way ahead for environmental management in the future With its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all It is an essential reference for undergraduates and postgraduates studying environmental management and sustainability and an important resource for many students on courses including environmental science environmental studies and human geography

Climate Change 2007: Mitigation of climate change, 2007 Protected Area Management Graeme Worboys, Michael Lockwood, Terry De Lacy, 2005 Protected Area Management Principles and Practice 2e examines the multi disciplinary task of managing protected areas This second edition of this authoritative text has been updated expanded and includes new AUstralian and international case studies

Dollars & Sense, 2003 *Integrated Resource and Environmental Management* D. Scott Slocombe, Kevin Stuart Hanna, 2007 The aim of this volume is to provide a coherent set of chapters that address major issues in resource and environmental management The book has a North American focus with significant but not exclusive Canadian Content Integration is the organizing theme of the volume Integration as a concept meaning variously integration across disciplines across agencies and across sectors has been a key theme in the policy and management rhetoric of virtually every agency in North America and abroad for more than 30 years As one of the dominant themes of the discipline integration has been addressed both as a component and as the main focus of a variety of texts for this course However there is nothing on the market at the moment that is both up to date and North American in approach
