Stability Domains Lyubomir T. Gruyitch, Jean-Pierre Richard, Pierre Borne, Jean-Claude Gentina, 2003-12-15 Stability Domains is an up to date account of stability theory with particular emphasis on stability domains Beyond the fundamental basis of the theory of dynamical systems it includes recent developments in the classical Lyapunov stability concept practical stability properties and a new Lyapunov methodology for nonlinear systems It also introduces classical Lyapunov and practical stability theory for time invariant nonlinear systems in general and for complex interconnected large scale nonlinear dynamical systems in particular This is a complete treatment of the theory of stability domains useful for postgraduates and researchers working in this area of applied mathematics and engineering *Stability Domains* Lyubomir T. Narendra, 2014-01-16 Frequency Domain Criteria for Absolute Stability presents some generalizations of the well known Popov solution to the absolute stability problem proposed by Lur e and Postnikov in 1944 This book is divided into nine chapters that focus on the application of Lyapunov s direct method to generate frequency domain criteria for stability The first eight chapters explore the systems with a single nonlinear function or time varying parameter These chapters also discuss the development of stability criteria for these systems the sufficiency theorems and Lyapunov function Some of the theorems applied to a damped version of the Mathieu equation and to a nonlinear equation derived from it are also covered The concluding chapter deals with systems with multiple nonlinearities or time varying gains This chapter also outlines the basic definitions and tools as well as the derivation of stability criteria This work will serve as a reference for research courses concerning stability problems related to the absolute stability problem of Lur e and Postnikov Engineers and applied mathematicians will also find this book invaluable **Transport Phenomena in Rotating Machinery: Dynamics I**, 1998 **Introduction to a Biological Systems Science** Edward H.
