Perkasa,2025-10-01 River Cities in Asia uncovers the intimate relationship between rivers and cities in Asia from a multi  
disciplinary perspective in the humanities and the social sciences As rivers have shaped human settlement patterns  
economies culture and rituals so too have humans impacted the flow and health of rivers In Asia the sheer scale of  
urbanization increases the urgency of addressing challenges facing urban rivers leading to the importance of historically  
socially and culturally relevant solutions However cities are also uneven landscapes of power affecting chances to achieve  
holistic ecological approaches The central premise of River Cities in Asia is that a river city is one where proximity between a  
river and a city exists across time and space natural and social dimensions Recognition of these deep connections can help to
