Toleration As Recognition:

Toleration as Recognition Anna Elisabetta Galeotti,2002-03-14 In this 2002 book Anna Elisabetta Galeotti examines the most intractable problems which toleration encounters and argues that what is really at stake is not religious or moral disagreement but the unequal status of different social groups Liberal theories of toleration fail to grasp this and consequently come up with normative solutions that are inadequate when confronted with controversial cases Galeotti proposes as an alternative toleration as recognition which addresses the problem of according equal respect to groups as well as equal liberty to individuals She offers an interpretation that is both a revision and an expansion of liberal theory in which toleration constitutes an important component not only of a theory of justice but also of the politics of identity Her study will appeal to a wide range of readers in political philosophy political theory and law *Toleration, Respect and Recognition in Education* Mitja Sardoc,2011-07-13 *Toleration Respect and Recognition in Education* brings together a collection of papers examining the complexity of different interpretations of toleration respect and recognition in education Discusses different theories of toleration and shows how it lies at the centre of a liberal pluralistic society Brings together the work of leading scholars from a range of disciplines Examines how education can accommodate diversity and promote shared public values **Tolerance, Intolerance and Respect** J. Dobbernack,T. Modood,2013-06-27 Across European societies pluralism is experienced in new and challenging ways Our understanding of what it means for societies to be accepting of diversity has to therefore be revisited This volume seeks to meet this challenge with perspectives that consider new dynamics towards tolerance intolerance and respect **Toleration and Recognition in an Age of Religious Pluralism** Monica Mookherjee,2010 *Contested Concepts in Migration Studies* Ricard Zapata-Barrero,Dirk Jacobs,Riva Kastoryano,2021-11-29 This volume demonstrates that migration and diversity related concepts are always contested and provides a reflexive critical awareness and better comprehension of the complex questions driving migration studies The main purpose of this volume is to enhance conceptual thinking on migration studies Examining interaction between concepts in the public domain the academic disciplines and the policy field this book helps to avoid simplification or even trivialization of complex issues Recent political events question established ways of looking at issues of migration and diversity and require a clarification or reinvention of political concepts to match the changing world Applying five basic dimensions each expert chapter contribution reflects on the role concepts play and demonstrates that concepts are ideology dependent policy politics dependent context dependent discipline dependent and language dependent and are influenced by how research is done how policies are formulated and how political debates extend and distort them This book will be essential reading for students scholars and practitioners in migration studies politics migrant integration citizenship studies racism studies and more broadly of key interest to sociology political science and political theory *Toleration, Respect and Recognition in Education* Mitja Sardoc,2010 *Toleration Respect and Recognition in Education* brings together a collection of papers

Justification and Critique Rainer Forst,2014 Rainer Forst develops a critical theory capable of deciphering the deficits and potentials inherent in contemporary political reality This calls for a perspective which is immanent to social and political practices and at the same time transcends them Forst regards society as a whole as an order of justification comprising complexes of different norms referring to institutions and corresponding practices of justification The task of a critique of relations of justification therefore is to analyse such legitimations with regard to their validity and genesis and to explore the social and political asymmetries leading to inequalities in the justification power which enables persons or groups to contest given justifications and to create new ones Starting from the concept of justification as a basic social practice Forst develops a theory of political and social justice human rights and democracy as well as of power and of critique itself In so doing he engages in a critique of a number of contemporary approaches in political philosophy and critical theory Finally he also addresses the question of the utopian horizon of social criticism
