Using a Microcomputer in the Classroom Gary G. Bitter, Ruth A. Camuse, 1984 Shows Teachers Administrators Parents How to Introduce Microcomputers to Children in Grades K 12 Using Computer Assisted Instruction **Using Microcomputer in the Classroom** Gary G. Bitter, 1998-12-01 **Microcomputers and the Classroom Teacher** Gail A. Caissy, 1987 This monograph for teachers addresses two emerging areas in the computing field providing inservice training in microcomputer use for the general teaching population and integrating the use of microcomputers into the overall curriculum A brief discussion of why computers should be used in the classroom introduces five chapters which provide overviews of the following topics 1 the use of computers in teaching and learning areas of computer use and using the computer as a teaching learning tool 2 types of software available for schools computer assisted instruction software applications software and databases 3 integrating computers into the classroom 4 developing a plan for using computers in the classroom setting up a classroom computer center and working with only one computer in the classroom and 5 evaluating educational software general questions questions about instructional design and questions about physical characteristics of the program A concluding statement argues that the key to continued growth and expansion in the educational computing field lies with classroom teachers and urges them to take an interest in computers and begin to use this important new tool in their classrooms A 71 item reference list concludes the document EW Using Microcomputers in the Social Studies Classroom Robert B. Abelson, 1983 The purpose of this book is to help teachers feel at ease with microcomputers so that they will begin to think of computers as tools that they themselves might use There are four chapters The first chapter provides basic information to help a user understand the computer Discussed are how the computer is put together and how it works To help teachers generate ideas about how this new educational aid might be useful in terms of their own teaching objectives the second chapter describes why and how other educators are using the computer Chapter 3 is an introduction to software evaluation i e how computer programs that are available for use in the classroom can be judged Criteria are presented It is suggested that teachers using computer assisted instruction should have a feel for some of the broader issues related to computers in education as well as practical knowledge The purpose of the fourth chapter which deals with social and educational issues and directions is to provide a perspective about these broader issues and a context into which teachers might place their own activities Most of the book s readings provide a bibliography of references and further resources In addition a list of resources available through the ERIC system is provided RM *Mastering the Micro* Dorothy H. Judd, Robert C. Judd, 1984 Introduces the Micro Its Use in the Classroom Shows Teachers Common Program Languages Integrating the Micro into Curriculums Word Processing to Develop Skills **Microcomputers in Primary Education** ,1983 **Issues in Training Teachers to Use Microcomputers in the Classroom** Robert D. Classroom Instruction, 1983 A widely shared belief among many policy makers educators parents and the general public is that microcomputers have the potential to help pull U S education out of its current state of mediocrity National Commission on Excellence in Education 1983 and subsequently improve its quality A number of barriers however impede the widespread implementation of microcomputers in classrooms Along with cost the major barrier to full implementation is the lack of knowledge possessed by researchers and educational practitioners alike regarding the nature of the knowledge skills and attitudes a teacher must have to use microcomputers successfully in classroom instruction This paper addresses the standard implied in such an evaluation that is the nature of successful classroom microcomputer use that might be embodied in the teaching of widely recognized expert or master teachers From the teachers standpoint microcomputers are an educational technology used as an instructional tool Thus the application of the instruction tool should be central to such an evaluation within the broader context of ongoing classroom instruction

Teachers, Computers, and Curriculum Paul Geisert, Mynga K. Futrell, 2000 Here is a book that pointedly focuses on what teachers need to consider in their classroom decision making Its main emphasis is on classroom and curricular integration not on the panoply of available technology It addresses the needs and concerns of preservice and inservice teachers of different experiential backgrounds from computer novice through long time proficient users The book is up to date with coverage of the Internet and World Wide Web and classroom networks and the latest on multimedia applications Just as importantly this book reflects the shift of emphasis in how schools are putting technology to use with K 12 youngsters toward genuine fusion of computer use with instructional processes in diverse areas The new tripartite structure of the book covers 1 the information on the integration of technology into the curriculum in its 10 chapters 2 supportive computer literacy and technology information within the six primer sections interspersed throughout the text and 3 computer and pedagogical resources at chapters ends Thus the book emphasizes methods of classroom and curricular integration while simultaneously reviewing the necessary information and issues to consider when deciding on computers for one s classroom Additionally the authors address significant concerns including quality of software gender equity and copyright issues For pre service and in service teachers who need recommendations for quality software for use in K 12 educational settings

Using a Microcomputer in the Classroom Gary G. Bitter, Ruth A. Camuse, Vicki L. Durbin, 1993 Addressing the role of computers in learning and the means of integrating and applying computer technology into the curriculum this text emphasizes all the important basic topics related to technology in education There is coverage of multimedia hypermedia designing lesson plans and how to evaluate and choose software all supported by numerous forms and charts

Resources in Education, 1988 **Microcomputer Use in Kindergarten and at Home**, 1986 The purpose of this study was to systematically examine the cognitive and social effects of the use of microcomputers with kindergarten children in the school and at home Three schools received microcomputers for use in

kindergarten classrooms and each student in one of the classrooms was provided a PCjr and educational software to use at home Software used by the children consisted of games simulations and drill and practice programs that coincided with the goals of the kindergarten curriculum Two additional schools served as control groups It was hypothesized that computer using classrooms would make larger academic gains than the other classes It was also expected that the home use group would gain more than the classroom use only group The impact of the use of microcomputers was assessed by a criterion referenced pre and post test based on the objectives of the school district s kindergarten curriculum guides The test included subsections concerning reading readiness mathematics Piagetian cognitive operations and keyboard knowledge Findings indicated that the use of microcomputers in the classroom facilitated the acquisition of school readiness skills When supplemented by concurrent computing activities at home academic gains were even greater No indication was found that computing experiences interfere with the normal cognitive development of preschoolers and no gender related differences in cognitive gains achieved were found RH
