

# Diseño visual

El **diseño visual** o **diseño en comunicación visual** es una disciplina profesional que estudia los sistemas de información, con el objeto de convertir los datos en formas visuales, teniendo en cuenta los procesos perceptivos. Consiste en la creación de imágenes funcionales con fines netamente comunicacionales, para esto se hace uso de las nuevas tecnologías para un desarrollo más estructurado.

**Diseño Visual** es una denominación profesional del diseño que analiza y transforma datos en estructuras visuales mediante el conocimiento de procesos perceptivos (ciencia de la visión) y cognitivos, el reconocimiento de los contextos socioculturales para su planificación en los dispositivos y soportes de la imagen, con el fin de generar sistemas de información que interactúan con la comunidad y sus referentes significacionales, a través de los procesos comunicativos.

Desde esta perspectiva, el Diseño Visual coordina, gestiona y administra sistemas de información visual, categoriza las variables visuales, investiga los procesos cognitivos, evalúa las metodologías del diseño, determina la pertinencia de los soportes de la imagen de acuerdo a la naturaleza de la información para la ejecución general de un proyecto de diseño.
