White,1986-04-03 The theory of matroids is unique in the extent to which it connects such disparate branches of combinatorial theory and algebra as graph theory lattice theory design theory combinatorial optimization linear algebra group theory ring theory and field theory Furthermore matroid theory is alone among mathematical theories because of the number and variety of its equivalent axiom systems Indeed matroids are amazingly versatile and the approaches to the subject are varied and numerous This book is a primer in the basic axioms and constructions of matroids The contributions by various leaders in the field include chapters on axiom systems lattices basis exchange properties orthogonality graphs and networks constructions maps semi modular functions and an appendix on cryptomorphisms The authors have concentrated on giving a lucid exposition of the individual topics explanations of theorems are preferred to complete proofs and original work is thoroughly referenced In addition exercises are included for each topic **Conformal Groups in Geometry and Spin Structures** Pierre Anglès,2007-11-29 This book provides a self contained overview of the role of conformal groups in geometry and mathematical physics It features a careful development of the material from the basics of Clifford algebras to more advanced topics Each chapter covers a specific aspect of conformal groups and conformal spin geometry All major concepts are introduced and followed by detailed descriptions and definitions and a comprehensive bibliography and index round out the work Rich in exercises that are accompanied by full proofs and many hints the book will be ideal as a course text or self study volume for senior undergraduates and graduate students **Advances in Electronics and Electron Physics** ,1978-02-22 *Advances in Electronics and Electron Physics* Evolutionary Computation Wellington Santos,2009-10-01 This book presents several recent advances on Evolutionary Computation specially evolution based optimization methods and hybrid algorithms for several applications from optimization and learning to pattern recognition and bioinformatics This book also presents new algorithms based on several analogies and metafores where one of them is based on philosophy specifically on the philosophy of praxis and dialectics In this book it is also presented interesting applications on bioinformatics specially the use of particle swarms to discover gene expression patterns in DNA microarrays Therefore this book features representative work on the field of evolutionary computation and applied sciences The intended audience is graduate undergraduate researchers and anyone who wishes to become familiar with the latest research work on this field **Journal de la Société Royale D'astronomie Du Canada** Royal Astronomical Society of Canada,1930 Library catalogue in 1911 31 p appended to v 4 **Advances in Additive Manufacturing and Joining** M.
