The paper emphasizes the need for empirical validation of the RBV model's application to e-commerce. Research Paper 2 conducts an empirical study to determine if e-commerce capabilities contribute to firm-level performance, finding a significant positive correlation. It suggests that firms must cultivate hard-to-replicate capabilities for sustained advantage rather than relying solely on technology or outsourcing. Research Paper 3 examines the correlation between e-commerce barriers and firm performance, revealing a significant negative impact on performance. It underscores the importance of simultaneously developing capabilities to mitigate competitive disadvantages.
