Exploring Composition Studies Kelly Ritter, Paul Kei Matsuda, 2012-04-30 Kelly Ritter and Paul Kei Matsuda have created an essential introduction to the field of composition studies for graduate students and instructors new to the study of writing The book offers a careful exploration of this diverse field focusing specifically on scholarship of writing and composing Within this territory the authors draw the boundaries broadly to include allied sites of research such as professional and technical writing writing across the curriculum programs writing centers and writing program administration Importantly they represent composition as a dynamic eclectic field influenced by factors both within the academy and without The editors and their sixteen seasoned contributors have created a comprehensive and thoughtful exploration of composition studies as it stands in the early twenty first century Given the rapid growth of this field and the evolution of its research and pedagogical agendas over even the last ten years this multi vocal introduction is long overdue

Guide to College Writing Assessment Peggy O'Neill, Cindy Moore, Brian Huot, 2009-03-20 While most English professionals feel comfortable with language and literacy theories assessment theories seem more alien English professionals often don t have a clear understanding of the key concepts in educational measurement such as validity and reliability nor do they understand the statistical formulas associated with psychometrics But understanding assessment theory and applying it by those who are not psychometricians is critical in developing useful ethical assessments in college writing programs and in interpreting and using assessment results *A Guide to College Writing Assessment* is designed as an introduction and source book for WPAs department chairs teachers and administrators Always cognizant of the critical components of particular teaching contexts O'Neill Moore and Huot have written sophisticated but accessible chapters on the history theory application and background of writing assessment and they offer a dozen appendices of practical samples and models for a range of common assessment needs Because there are numerous resources available to assist faculty in assessing the writing of individual students in particular classrooms *A Guide to College Writing Assessment* focuses on approaches to the kinds of assessment that typically happen outside of individual classrooms placement evaluation exit examination programmatic assessment and faculty evaluation Most of all the argument of this book is that creating the conditions for meaningful college writing assessment hinges not only on understanding the history and theories informing assessment practice but also on composition programs availing themselves of the full range of available assessment practices

Development for Graduate Students in English Cindy Moore, Hildy Miller, 2006 In this guide the first of its kind Cindy Moore and Hildy Miller provide detailed information about how to develop credentials for both academic and nonacademic careers in teaching scholarship administration service and editing Written in response to nationwide calls for more comprehensive and deliberate mentoring of future English faculty and for greater support of students who wish to pursue English oriented jobs outside of the academy this guide the first of its kind is at once practical and eye opening Providing detailed information about how to develop credentials for both academic and nonacademic careers in teaching scholarship administration service and editing the guide offers an in-depth look at the field's many possibilities On another level the book addresses the rigors and stresses of graduate school by candidly discussing faculty expectations student responsibilities and a variety of survival strategies Whether you are already enrolled in a graduate program or have just begun to consider program options this resource can help you identify long term career goals as well as the skills and abilities needed to meet those goals

Everyday Writing Center Anne Ellen Geller, 2007 In a landmark collaboration five co authors develop a theme of ordinary disruptions the everyday as a source of provocative learning moments that can liberate both student writers and writing center staff At the same time the authors parlay Etienne Wenger's concept of community of practice into an ethos of a dynamic learner centered pedagogy that is especially well suited to the peculiar teaching situation of the writing center They push themselves and their field toward deeper more significant research more self-conscious teaching **Blurring Boundaries** Peggy O'Neill, 2007 Brings together scholars from various disciplines institutions methodologies and genres who are interested in writing and preparing teachers and researchers of writing This book covers topics such as writing assessment teaching writing and teacher preparation graduate education electronic technologies community literacy and more Discord And Direction Sharon James McGee, Carolyn Handa, 2005-08-30 The collection further argues that postmodernism offers a useful lens through which to understand the work of WPAs and to examine the discordant cultural and institutional issues that shape their work Each chapter tackles a problem local to its author's writing program or experience as a WPA and each responds to existing discord in creative ways that move toward rebuilding and redirection Jacket **Writing on the Edge**, 2002 **Changing of Knowledge in Composition** Lance Massey, Richard C. Gebhardt, 2011-07-16 Lance Massey and Richard Gebhardt offer in this collection many signs that composition again faces a moment of precariousness even as it did in the 1980s the years of the great divorce from literary studies The contours of writing in the university again are rapidly changing making the objects of scholarship in composition again unstable Composition is poised to move not from modern to postmodern but from process to postprocess from a service oriented field to a research driven discipline Some would say we are already there Momentum is building to replace composition and the pedagogical imperative long implied in that term with a writing studies model devoted to the study of composition as a fundamental tool of and force within all areas of human activity Appropriately contributors here use Stephen M North's 1987

book *The Making of Knowledge in Composition* to frame and background their discussion as they look at both the present state of the field and its potential futures As in North's volume *The Changing of Knowledge in Composition* describes a body of research and pedagogy brimming with conflicting claims methodologies and politics and with little consensus regarding the proper subjects and modes of inquiry The deep ambivalence within the field itself is evident in this collection Contributors here envision composition both as retaining its commitment to broad based generalized writing instruction and as heading toward content based vertical writing programs in departments and programs of writing studies They both challenge and affirm composition's pedagogical heritage And they sound both sanguine and pessimistic notes about composition's future
