Striking A Balance:

Striking a Balance Nancy L. Cecil, 2017-05-12 *Striking a Balance* explores a comprehensive program of early literacy instruction through a balanced approach to reading and writing for both enjoyment and information. The fifth edition retains the special features that adopters have come to appreciate: classroom vignettes, discussion questions, field-based activities, a student website, and study guide. This latest edition offers expanded content on differentiating instruction for diverse learners, including working with English Language Learners and students with special needs. Also new to this edition is greater coverage on integrating state standards with early literacy instruction. The book's practical approach fundamentally demonstrates how children develop authentic literacy skills through a combination of direct strategy instruction and motivating contexts.

Must We Defend Nazis? Richard Delgado, Jean Stefancic, 1997 In *Must We Defend Nazis* Richard Delgado and Jean Stefancic set out to liberate speech from its current straight jacket. Over the past hundred years almost all of American law has matured from the mechanical jurisprudence approach which held that cases could be solved on the basis of legal rules and logic alone to that of legal realism which maintains that legal reasoning must also take into account social policy, common sense, and experience. But in the area of free speech the authors argue such archaic formulas as the prohibition against content regulation, the maxim that the cure for bad speech is more speech, and the speech act distinction continue to reign, creating a system which fails to take account of the harms speech can cause to disempowered, marginalized people. Focusing on the issues of hate speech and pornography, this volume examines the efforts of reformers to oblige society and law to take account of such harms. It contends that the values of free expression and equal dignity stand in reciprocal relation. Speech in any sort of meaningful sense requires equal dignity, equal access, and equal respect on the parts of all of the speakers in a dialogue; free speech, in other words, presupposes equality. The authors argue for a system of free speech which takes into account nuance, context, sensitivity, and competing values such as human dignity and equal protection of the law.
