Robson, 1973      **Urban Growth**, 2007 Do large cities grow more or less rapidly than small ones Why should the relationship between city size and population growth vary so much from one period to another This book studies the process of population growth in a national set of cities relating its findings to the theoretical concepts of urban geography To test his ideas the author studies the growth of cities in England and Wales between 1801 and 1911 His explanations draw strongly on the connection between growth and the adoption of innovations He develops a model of

G. Jonas, David Wilson, 1999-08-12 Harvey Molotch s city as a growth machine thesis is one of the most influential approaches to the analysis of urban politics and local economic development in the United States However the nature and context of urban politics have changed considerably

since the growth machine thesis was first proposed more than twenty years ago and recent attempts to apply it to settings outside the U S have revealed conceptual and empirical limitations This book offers a unique critical assessment of the contribution of the growth machine thesis to research in urban political economy Written from an interdisciplinary and international perspective it brings together leading urban studies scholars These contributors explore three organizing themes urban growth discourse and ideology new dimensions of urban politics and the growth machine in comparative perspective These themes not only provide the focus for the critical examinations of the growth machine thesis but also offer exciting new ways of thinking about and researching urban politics and local economic development As Harvey Molotch himself notes in this book s concluding chapter The growth machine idea makes a substantive argument about the empirical substance of U S urban regimes It asserts that virtually every city and state government is a growth machine and long has been It asserts that this puts localities in chronic competition with one another in ways that harm the vast majority of their citizens as well as their environments It anticipates an ideological structure that naturalizes growth goals as a background assumption of civic life In a social science realm where successful empirical generalizations have been few the growth machine idea robustly and usefully describes reality Contributors include Thabit Abu Rass Keith Bassett Mark Boyle Allan Cochrane Kevin R Cox Kyle Crowder Melissa R Gilbert Bob Jessop Andrew Kirby Mickey Lauria Helga Leitner John R Logan Harvey Molotch Jamie Peck Stephanie Pincetl Eric Sheppard John Rennie Short Adam Tickell Rachel Bridges Whaley and Andrew Wood
