Commission of Conservation, Civic Improvement League of Canada, 1917 *Hidden Cities* World Health Organization. Centre for Health Development, 2010 The joint WHO and UN HABITAT report Hidden cities unmasking and overcoming health inequities in urban settings is being released at a turning point in human history For the first time ever the majority of the world's population is living in cities and this proportion continues to grow Putting this into numbers in 1990 fewer than 4 in 10 people lived in urban areas In 2010 more than half live in cities and by 2050 this proportion will grow to 7 out of every 10 people The number of urban residents is growing by nearly 60 million every year This demographic transition from rural to urban or urbanization has far reaching consequences Urbanization has been associated with overall shifts in the economy away from agriculture based activities and towards mass industry technology and service High urban densities have reduced transaction costs made public spending on infrastructure and services more economically viable and facilitated generation and diffusion of knowledge all of which have fuelled economic growth Page ix **Integrated Urban Health Guidance**, 1977 Urban Health, Sustainability, and Peace in the Day the World Stopped Ali Cheshmehzangi, 2021-08-30 This book covers the nexus between urban health sustainability and peace Urban Health Sustainability and Peace is the first book that attempts to put these three critical areas together This novelty approaches the subject matter by delving into evaluating what works what does not work and what should be done to achieve healthy cities We believe this book will be beneficial to a wide range of stakeholders particularly policymakers planners and developers who continuously shape and reshape the structure and environments of our cities and communities Unfortunately in most cases the healthiness of the cities may not be of their

immediate concern Nevertheless it is the concern of the end users citizens or simply those who live and work in cities and communities worldwide To safeguard peace in cities one has to consider sustaining urban health and that is the main aim of this book The ongoing pandemic gives us an excellent reason to study cities health During such a disruptive time we detect many flaws in cities and communities around the world We primarily identify the negative impacts on sustainability and peace in cities In order to sustain a healthy city this book evaluates six sustainability dimensions of physical environmental economic social institutional and technical It then utilizes eight primary dimensions of positive peace evaluating critical areas for future considerations in urbanism These considerations include making cities smarter more resilient and more sustainable The book s ultimate goal is to highlight how we should progress to maintain and sustain urban health As a continuation to The City in Need this book covers the nexus between urban health sustainability and peace Furthermore by reflecting on the ongoing pandemic crisis metaphorically labelled as The Day the World Stopped we delve into some key areas beyond the usual planning and policy guidelines Lastly the book intends to highlight what has not been studied before i e the relationship between urban health sustainability and peace [Accessions List, India Library of Congress](#).
