Small Perfect Things:

The Short Story Valerie Shaw,2014-07-21 Throughout this text Valerie Shaw addresses two key questions What are the special satisfactions afforded by reading short stories and How are these satisfactions derived from each story s literary techniques and narrative strategies She then attempts to answer these questions by drawing on stories from different periods and countries by authors who were also great novelists like Henry James Flaubert Kafka and D H Lawrence by authors who specifically dedicated themselves to the art of the short story like Kipling Chekhov and Katherine Mansfield by contemporary practitioners like Angela Carter and Jorge Luis Borges and by unfairly neglected writers like Sarah Orne Jewett and Joel Chandler Harris

The Small Stuff of Roman Antiquity Emily Gowers,2025-01-21 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more Why are the small and unimportant relics of Roman antiquity often the most enduring in material form and in our affections Through close encounters with minor things such as insects brief lives quibbles irritants and jokes Emily Gowers provocatively argues that much of what the Romans dismissed as superfluous or peripheral in fact took up immense imaginative space It was often through the small stuff that the Romans most acutely probed and challenged their society s overarching values and priorities and its sense of proportion and justice There is much to learn from what didn t or shouldn t matter By marking the spots where the apparently pointless becomes significant this book radically adjusts our understanding of the Romans and their world as well as our own minor feelings and intimate preoccupations

Grounding the Nietzsche Rhetoric of Earth Adrian Del Caro,2004 The words grounding rhetoric and earth represent the book s tripartite structure Using a philological method Del Caro reveals the ecological Nietzsche whose doctrines are strategies for responsible and creative partnership between humans and earth The major doctrines are shown to be related to early writings linked to paganism the quotidian and the closest things of Human All Too Human Perspective is shifted from time to place in the eternal recurrence of the same and from power to empowerment in the will to power This book is the first to comprehensively address the issue of where Nietzsche stands in relation to environment and it will contribute to the greening of Nietzsche

Principles of the Enneagram Karen Webb,2012-11-01 Explains how the enneagram model works the characteristics of the nine personality types how to recognize personality types in others and how to apply the model to personal growth

Teenage Time Pamela Thurschwell,2025-07-24 The first critical study of teenage identity that explores the unstable temporal division between adolescence and adulthood and how this figure disrupts narrative and teleology across literature film and sub cultural history

Christ in humanity Jane Fisher,1914

Nature of the Sun will teach you a new cosmology model that doesn't require mathematics making it easy to understand This book will also teach you how the human brain works which will allow you to understand people exactly The new cosmology model uses infinities rather than calculations and is so simple it has to be true Reading Nature of the Sun will allow anyone to become a cosmologist You will see how infinities create particles and how they create physics There are some hidden things to cosmology science hasn't understood yet and you could be one of the first to know Even DNA makes use of cosmological infinities which is also explained in the book The brain model will teach you how thinking exactly works There is a trick the brain uses to wire itself up and it is easy to understand once read The brain model also explains your instincts and once read you will understand your own feelings or see why people behave the way they do The brain model which is new to science will teach people to become honest again in a world that doesn't know how to do this respectfully I spend twelve years perfecting the book Nature of the Sun and I wrote eleven books inside for your pleasure to learn how the hidden things of the mind and cosmology work and much more like how personality disorders are caused based on instinctual feelings This book was created fully based on logic so if you like to learn logical explanations of how the brain and cosmology work this book is for you
