## **Spree Killers:**

**Spree Killers** Mark Safarik, Katherine Ramsland, 2019-10-18 *Spree Killers Practical Classifications for Law Enforcement and Criminology* is the only exhaustive up to date analytical book on spree killers standing apart from those dedicated to mass murderers and serial killers. Multicides have traditionally been categorized as double triple mass serial and spree while mass and serial have been further divided into subcategories. Spree killing which involves the killing of at least three persons at two or more locations due to a precipitating incident that fuels the urge to kill remains a poorly defined concept. In the United States the Federal Bureau of Investigation FBI eliminated this term from its multicide nomenclature in 2005 but the authors examination of 359 cases involving 419 spree killers from 43 countries shows that not only is there enough diversity among spree killers to form classifications similar to those devised for mass and serial but also that subtypes offer distinct utility for identification tracking and warning potential targets. Spree Killers outline the designation of spree killer specifically and thoroughly. In addition to looking at existing literature specific cases and the behavioral patterns it offers a fully worked up profile for the typology. The behaviors and motives for spree killers align in six categories which are detailed in full. The book provides unique insight for police forensic and investigative personnel into what to look for to respond to and in some cases identify and stopping certain types of spree killings.

**Making Sense of Homicide** Adam Lynes, Elizabeth Yardley, Lucas Danos, 2021-01-15 The first dedicated textbook for Criminology students studying homicide. As the authors explain criminal homicide is but one form of lethal violence victims may suffer leading them to describe a much broader range of scenarios. Ranging from murder to manslaughter to State killings genocide and disasters involving victims of public policy corporate crime or shortcomings in health and safety. *Making Sense of Homicide* re positions discussion of the topic for those wishing to see beyond routine media hype and ill informed popular discourse. The book also contains a special expert contribution by former Police Superintendent Ronald Winch about how the UK police investigate homicide including fundamental requirements and pitfalls. The book ranges in scope from serial killing to mass and spree homicide and across the jurisdictions of the UK USA and other countries. Also interweaved in this key resource are acutely observed accounts of the Holocaust capital punishment and homicide within a consumer society. The authors explain the categories within which homicide is conventionally discussed as well as crimes of the powerful and those made opaque for political economic or other questionable purposes making the work one of immense value to anyone wishing to see violence through a new lens. A hugely wide ranging explanation of homicide perfect for dedicated courses. The book demonstrates how homicide definition stems from political cultural and societal choices and looks at the deficits in homicide classifications. An entirely fresh look at the subject. From the Foreword It is no small feat to offer such robust understandings of homicide. A judicious and much needed collection at a time in which our existence is evermore enveloped by aspects of death despair and homicide in all its various malignant forms. Professor David Wilson. Authors Dr Adam Lynes Professor Elizabeth Yardley and Lucas Danos all teach at
