consciousness and self in a nuanced manner **The Ecological Self** Emory University,1993 Exploring Self toward expanding Teaching, Teacher Education and Practitioner Research Oren Ergas,Jason K Ritter,2020-10-29 Against the backdrop of a pull toward external standards and accountability this collection of chapters re grounds us in the importance of bringing the self to the foreground of the discourse of teaching teacher education and practitioner research **The Self in Infancy** P. Rochat,1995-10-30 The origins of knowledge about the self is arguably the most fundamental problem of psychology It is a classic theme that has preoccupied great psychologists beginning with William James and Freud On reading current literature today s developmental psychologists and ethologists are clearly expressing a renewed interest in the topic Furthermore recent progress in the study of infant and animal behavior provides important and genuinely new insights regarding the origins of self knowledge This book is a collection of current theoretical views and research on the self in early infancy prior to self identification and the well documented emergence of mirror self recognition The focus is on the early sense of self of the young infant Its aim is to provide an account of recent research substantiating the precursors of self recognition and self identification By concentrating on early infancy the book provides an updated look at the origins of self knowledge Returning the Self to Nature Jeanine M. Canty,2022-11-01 Nautilus Book Award Winner Using the lens of ecopsychology Returning the Self to Nature shows that the pervasive and extreme forms of narcissism we find in many modern societies are fundamentally the result of alienation from the natural world But it doesn t have to be that way Returning the Self to Nature is written for the person who no longer wishes to function in a world that revolves around selfish disconnected identity models and yearns to step into healthy relationships with one s self one s community and our planet Seeing the suffering of the planet and that of humans as inseparably linked the ecological crisis as psychological crisis and vice versa opens the door to a mutuality of healing between people and nature At the heart of both chronic and acute forms of narcissism is a socially constructed false self an isolated damaged ego in a delusional cycle of selfishness Through unflinching analysis and meditation practices that encourage visualizing and embodying the wild naturalness of being human the reader will gain skills to begin experiencing a courageous pluralistic and ecological self This book is an invitation to wake up from the dream of the false self and join the movement toward social and planetary healing **Reconceptualizing the Ecological Self** Lisa Kretz,2008 A Developmental Sequence for the Ecological Self Andrew Slade,1991
