A tale of rapacious colonialism Cold War spy games dazzling technical innovation big business rivalry big power geopolitics Niarchos has produced an unflinching landmark work on the nature of extractive capitalism Patrick Radden Keefe New York Times best selling author of *Empire of Pain* and *Say Nothing* Epic shocking and deeply reported *The Elements of Power* tells the story of the war for the global supply of battery metals essential for the decarbonization of our economies and the terrible bloody human cost of this badly misunderstood industry Congo is rich Swaths of the war torn African country lack basic infrastructure and after many decades of colonial occupation its people are officially among the poorest in the world But hidden beneath the soil are vast quantities of cobalt lithium copper tin tantalum tungsten and other treasures Recently this veritable periodic table of resources has become extremely valuable because these metals are essential for the global energy transition the plan for wealthy nations to wean themselves off fossil fuels by shifting to sustainable forms of energy such as solar and wind The race to electrify the world s economy has begun and China has a considerable head start From Indonesia to South America to Central Africa Beijing has invested in mines and infrastructure for decades But the U S has begun fighting back with massive investments of its own as well as sanctions and disruptive tariffs In this rush for green energy the world has become utterly reliant on resources unearthed far away and willfully blind to the terrible political environmental and social consequences of their extraction If the Democratic Republic of the Congo possesses such riches why are its children routinely descending deep into treacherous mines to dig with the most rudimentary of tools or in some cases their bare hands Why are Indonesia s seas and skies being polluted in a rush for battery metals Why is the Western Sahara a source for phosphates still being treated like a colony Who must pay the price for progress With unparalleled original reporting Nicolas Niarchos reveals how the scramble to control these metals and their production is overturning the world order just as the global race to drill for oil shaped the twentieth century Exploring the advent of the lithium ion battery and tracing the supply chain for its production Niarchos tells the story both of the people driving these tectonic changes and those whose lives are being upended He reveals the true devastating consequences of our best intentions and helps us prepare for an uncertain future If you have ever used a smartphone or driven an electric vehicle you are implicated     Idea Power Chicago Pneumatic Tool
