collaboration come with challenges that need to be mastered by organizations Project coordination building relationships establishing trust and achieving effective teamwork are only few aspects that differ from conventional teams when considered in detail Teams with multi cultural backgrounds that are geographically dispersed and virtually composed have been in practice and studied for more than three decades Yet managers still struggle with how to get them perform and collaborate properly Bad communication non existing trust and conflicts seem to be the main causes of failure in virtual collaboration The purpose of this research essay is to understand the characteristics of managing virtual teams by analysing relevant literature focused on the areas of building trust and managing conflicts in particular The essay aims to examine the impact and relation that trust and conflict management have with the performance of a team and the group s cohesion
